Brandy Giugno you'll most likely have an easier time if you do get it because the vax helps make it less and keeps you out of the hospital

A PARAMEDIC died from a form of lung cancer most common in smokers - despite never taking up the habit.

Meadhbh Cameron passed away on March 11 after being told two days before [Christmas](#) that she had just weeks to live.

The 24-year-old first noticed something was wrong in September when she coughed up a blood clot while in hospital as part of her job.

She had an intermittent night-time cough but no other [symptoms](#), however a scan revealed a shadow on her lung.

Four weeks later, Meadhbh was told she had stage 4 combined small cell [lung cancer](#) - an extremely aggressive and rare form of [cancer](#), not typically seen in a young, non-[smoker](#) in good health.

Meadhbh, who worked in Clydebank, [West Dunbartonshire](#), was given [chemotherapy](#) but the cancer had spread to bones and lymph nodes.

"They informed us that with chemo Meadhbh would likely have a year to live, if not more due to her age and health."

Meadhbh received three rounds of chemo but was hospitalised each time with neutropenia - a condition which results in a low number of white blood cells, neutrophils, in blood.

Lee said: "On the third time she was hospitalised, we were informed that [Meadhbh's treatment wasn't working](#) and that the cancer in her spine was compressing her spinal cord.

"On December 23, we were told that she had six to eight weeks to live."
Meadhbh passed away the day after Lee's 27th birthday.

My Take...

It isn't just doctors and nurses dying suddenly after being mandated to take COVID-19 mRNA vaccines.

Healthcare workers of every kind are now dying suddenly, many at a young age.

US insurance data presented by Ed Dowd on Steve Bannon's WarRoom: those who accepted COVID-19 vaccine mandates now have 550% higher disability and 40% higher mortality, than those who quit their jobs to avoid the jabs. ([click here](#))

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
