He’s now legally blind and has other symptoms related to mental focus and concentration, memory loss, mental impairment and obsessive compulsive disorder.

My Take...

COVID-19 mRNA vaccine spike protein is expressed in blood vessels, and the ensuing inflammatory reaction damages these blood vessels. In the brain, this can either result in a brain aneurysm, or simply a focal weakness, both of which are at high risk of rupture and bleeding, which is often fatal.

Brain bleeds can also be caused by COVID-19 mRNA vaccine induced turbo cancers that grow extremely rapidly, damaging adjacent blood vessels as they grow.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
