We refer Global Readers to:

[The How Bad Is My Batch Website](#)

*Displays number of deaths and disabilities associated with each batch/lot number = indication of **relative toxicity** of one batch/lot compared to another*

No one currently knows the reason why some batches/lots are associated with excessive deaths, disabilities and adverse reactions (up to 50 x). Until we do know, it is best to be cautious

*[“**Batch-code**” = “**Lot Number**” = the number they write on your vaccination card.]*

*

Check out your batch code (lot number)

Data Source

USA Data: All data is sourced from VAERS, a public database of over 700,000 adverse reaction reports for Moderna, Pfizer and Janssen Covid 19 vaccines in the USA.

Foreign Data: VAERS database now also includes data for Moderna, Pfizer and Janssen Covid 19 vaccines in countries **outside of the USA**. This data can be found here – [Vaccine Adverse Event Reporting System \(VAERS\)](#) – the last table listed. This non-domestic data has been submitted by foreign regulatory agencies and consists of approximately 1,000,000 adverse reaction reports.

Our intention is to present the VAERS data in an accessible and unadulterated form, that can be easily verified using the links below
