“Imagine visiting your doctor for a routine checkup, and on top of the usual shots — the annual flu or COVID vaccine — your doctor asks if you'd like to be vaccinated for cancer. All cancer — lung, skin, colon, you name it — with just one mildly uncomfortable jab in the arm.”

This is how a March 25, 2023 New York Post article starts. ([click here](#))

“That scenario, which sounds like something out of science fiction, might be closer than you think. And it's mostly thanks to the COVID vaccine – which in a few short years has become the highest-profile of the increasingly influential family known as mRNA vaccines.”

“Anna Blakney, an RNA researcher at the University of British Columbia, says we are currently in the midst of an “mRNA renaissance.”

These medicines “will be game changers in the years to come” she says.

No one wants failed mRNA vaccines anymore...

People may be done with COVID-19 and the failed Pfizer and Moderna COVID-19 mRNA vaccines, but the elites are not done with us.

Only 22.4% of Canadians are still taking these failed toxic products religiously, having taken a booster shot in the past 6 months despite growing evidence that these failed pharmaceutical products have injured millions of people.

Primary series completed ^a		
Total population	5 years and older	0 to 4 years
80.7% (24,396,513)	84.5% (24,304,405)	5.3% (99,422)

In last 6 months, primary series completed or booster dose received		
Total population	5 years and older	80 years and older
22.4% (8,705,405)	23.2% (8,604,103)	54.2% (953,754)

That means 8.7 million Canadians are still fully brainwashed. But this is not a large enough group to sustain mRNA as a viable pharmaceutical platform, in Canada or any other country.

1 billion doses of mRNA coming

When Moderna CEO Stephane Bancel was in Davos, Switzerland in January 2023, he held interviews claiming he wanted to produce over a billion doses of mRNA ([click here](#)).

They have no intention of stopping.

How to roll out new mRNA vaccines nobody wants...

Billions of dollars have been invested into a completely failed and toxic pharmaceutical platform. When they talk about the “success” of COVID-19 mRNA vaccines, they are talking about successfully fooling most of the population into taking a harmful, toxic product.

Before they can roll out new mRNA vaccines for influenza, RSV or CMV, which I believe they desperately want to roll out in 2023, they will need to either scare the population or rehabilitate the mRNA platform.

I believe they will try and scare the population with a H5N1 influenza pandemic that has a mortality rate of about 50%. ([click here](#))

They will then try to quickly roll out an mRNA H5N1 Influenza vaccine. This is already being suggested by GAVI, which received \$1.55 billion from the Bill and Melinda Gates Foundation. ([click here](#))

From a February 15, 2023 article by GAVI, titled: “Why bird flu vaccines need urgent R&D” ([click here](#))

“We haven’t yet tried mRNA vaccines with these viruses; we know they work to some degree, but how well they’d work and what level of protection they’d induce is still an open question.”

“The two-dose vaccine uses the same mRNA technology used to make COVID-19 vaccines, except this time it delivered small particles containing the instructions for making the haemagglutinin proteins found on the surface of the influenza virus into cells. The cells start manufacturing these proteins, triggering an immune response.”

“The real question now is how quickly such vaccines could be scaled up in the event of a pandemic.”

My Take...

An H5N1 Influenza pandemic with a claimed fatality rate of up to 50% would be the ideal new pandemic to scare people into accepting a new H5N1 mRNA vaccine that will be described as “safe and effective” and will be an attempt to rehabilitate the mRNA platform.

Moderna CEO has already claimed he can produce any new mRNA vaccine in less than 6 months.

If they fool enough people, they can then quickly release other mRNA vaccines: RSV, CMV, HIV and so on.

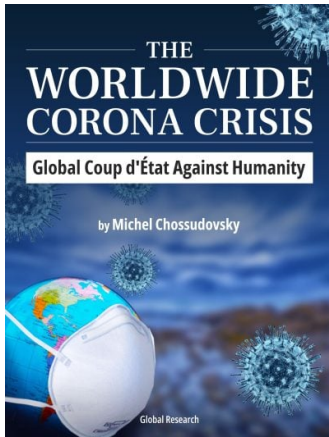

They have invested far too much money into mRNA to even consider stopping now.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
