The Organized Crime and Corruption Reporting Project (OCCRP) together with the Balkan Investigative Reporting Network revealed a scheme of weapons supply to the terrorists of ISIS and Jabhat al-Nusra.

There is no secret that the U.S. provides the so-called moderate opposition and Kurdish militia in Syria with arms and ammunition most of which are the weapons remained after the Soviet-led Warsaw Pact disbanded.

The U.S. DOD, through U.S. SOCOM, MacDill Air Force Base, Florida, as well as Picatinny Arsenal, American military research, and manufacturing facility located in Dover, New Jersey, acquired arms in some Eastern European countries including Ukraine for their further sending to Syria. The procurement volume has already exceeded \$700 billion.

Kiev used the logistical scheme elaborated by Washington to export arms and weapons from the Ukrainian armed forces weapons depots. The deal is estimated at \$110 billion.

Between June 5 and September 15, the United States sent 1,421 trucks loaded with weaponry to the “moderate” opposition, including 596 trucks (more than 40 %) from Ukraine. Most of them ended up in ISIS’ hands.

The General Staff of Ukraine took advantage of Oktyabrsk seaport located 25 kilometers southeast to Mykolaiv and Kiev air transport hub to supply weapons to the Middle East.

The transportation of weapons by air was the most effective procedure in terms of delivery speed. The weapons were transferred from ammunition depot No. 48 of Central Missile and Artillery Directorate situated in the Ukrainian town of Vinnytsia to Gavrishovka Airport and then delivered by 456 brigade jets to Kiev’s Boryspil International Airport.

Earlier, the Ukrainian authorities might have delivered arms and weapons through ammunition depot No. 65 located in Kharkiv’s Balakliya.

To cover up the illegal supplies, a series of deliberate arsons were organized at the military depots. The incident in Vinnytsia provoked the public outcry. According to the Ukrainian media, more than 40 tons of artillery shells were allegedly destroyed. In fact, this represents a basis of weapons sold and delivered to ISIS.

The similar cases won’t stop as Kiev needs to hide grand larceny and illegal arms sales from the public eye.
