

Human Rights for Children: Saving Children from COVID Measures Abuses

Open Letter to Dr. Nils Melzer, Swiss Human Rights Chair at the Geneva Academy

Background

The Geneva Academy of International Humanitarian Law and Human Rights is a postgraduate joint center located in Geneva, Switzerland. The faculty includes professors from both founding institutions and guest professors from major universities. – The Geneva Academy is affiliated with the University of Geneva.

Dr. Nils Melzer has been the Swiss Human Rights Chair (HR Chair) at the Geneva Academy since March 2016. As HR Chair he develops and promotes the Geneva Academy expertise in HR via policy work, cutting-edge research, expert meetings, the development of partnerships and teaching. Since November 2016, Nils Melzer has also been the [UN Special Rapporteur on torture and other cruel, inhuman and degrading treatment or punishment](#).

*

Dear Dr. Melzer,

As UN special Rapporteur on Torture, your mandate comprises three main activities:

- 1) transmitting urgent appeals to States with regard to individuals reported to be at risk of torture, as well as communications on past alleged cases of torture;
- 2) undertaking fact-finding country visits; and
- 3) submitting annual reports on activities, the mandate and [methods of work](#) to the Human Rights Council and the General Assembly.

See [this](#) for full description of mandate.

Dr. Melzer, your first mandate as Special Rapporteur on Torture is appealing urgently on States and Nations with regard to individuals that are at risk of torture and cruel, inhuman

and degrading treatment. This is the case with children, being forced to wearing masks, including in class, physical distancing, as well home schooling, out of touch with their friends and colleagues, but forced to be repeatedly covid tested in schools with the hurtful RT-PCT test (RT-PCT = reverse transcription of the polymerase chain reaction). A case in point – though not exclusive – is Switzerland, where cantonal authorities are compelling schools to periodically test children from as young as Kindergarten to pre-college level.

Children's mask wearing (as well as for senior adults) causes chronic headaches and fatigue, because blood and brain receive insufficient oxygen which may lead to lasting damage, including memory loss. Children suffer psychological traumas. Depression and suicide rates increase exponentially.

At the same time, children are increasingly being coerced via teachers and community authorities to be vaccinated against Covid-19, even though the mRNA-type "vaccines" almost the only so-called vaccines available in Europe and the US, are not officially considered as "vaccines" by CDC, but "experimental gene therapies," i.e. primarily the Pfizer, Moderna, AstraZeneca, Johnsons and Johnson and a number of other GAVI-supported COVAX injections, or so-called vaccines.

These so-called vaccines – or rather gene-therapy experimental inoculations – are known to be dangerous, see [Doctors for Covid Ethics Rebuttal Letter to the European Medicines Agency \(EMA\)](#) and bear special long-term risks for children.

Dr. Melzer, this is an Urgent Appeal – to save Human Rights for children around the world from cruel and inhuman covid measures applied to them, including to adolescents and young adults, measures that have nothing, but absolutely nothing to do with health protection but everything with oppression towards long-term slavery, and yes, a systematic and [massive-style depopulation](#).

You recently said correctly and wisely *"Sadly, today, torture remains a very real part of situations of conflict and violence"*. What many of the 193 UN member governments are forcing their children to go through is a form of torture, especially considering their potential – and likely – long-term effects – see again the [report of Doctors for Covid Ethics](#).

You added, that you won't be able to:

"save the world single-handedly as a Special Rapporteur, that there are hundreds of stakeholders – organizations, NGO's, UN agencies and individual experts – who have been working on torture issues for decades. [However], a Special Rapporteur's independence means I can pick up issues that have remained under the radar of the international community, bring them to the table and try to drive cooperation."

Dear Dr. Melzer, what I described before as cruel and inhuman acts against children, akin to torture, is one of those issues you mentioned. Therefore, my quest today – my Appeal to you, as Human Rights Representative – is to please pick up the issue of Covid-based Human Rights abuses on the world population, but particularly on children.

What the absurd covid measures do to the world is a crime, but what they are doing to children is beyond a crime; it is totally immoral, destructive for our powerless children, and for the future of these children, as well as for society as a whole, as children are our societies' future. And worse of all, these measures have nothing to do with health protection

- but absolutely nothing. They are sheer tyranny to control.

Children behind masks, social distancing, locked-down, remote schooling — deprived from meeting, talking and playing with their peers, friends, instead scaring them into losing their personalities, their self-assurance and self-esteem – results not only in a physical health problem, but also a psychological health issue which over time has untold, uncountable collateral damage, including total submissiveness for today's children.

Our children are vulnerable – they are our future.

They need their Human Rights defended.

Dear Dr. Melzer – please speak up for them, at the UN, at UNICEF, in front of the 193 UN member governments, which follow all more or less the same insane covid narrative, the same covid Human Rights abuse – and especially the same Human Rights abuse on children.

Thank you.
