A realistic humanoid robot doppel-gänger of everyone!

[My article from 21 March 2024](#) is becoming reality.

Now, you and everybody can have your own hyper-realistic robot-copy – including your facial expressions and everything.

The realistic appearance of robots in the video (see above) is today – imagine how indistinguishable robot copies of humans will be from real humans in a decade or two.

At the same time, Artificial General Intelligence and Artificial Human Emotions are being developed. In not many years, humanoid robots will have intelligence beyond humans. Robots will also register and handle your feelings, and have feelings and desires (objectives) of their own. And robots can be employed by the government or others without you knowing it.

The World of Blade Runner, of "I Robot" and other science fiction is just years around the corner.
