

Israel: The Nuclear Hegemon That Poses a Potential Threat to Europe

By [Hans Stehling](#)

Theme: [History](#), [Media Disinformation](#),
[Militarization and WMD](#)

It is calculated that in addition to the secret arsenal of up to 400 nuclear warheads, according to American Scientists, the Israeli state also reportedly possesses chemical and/or biological WMD, making it a dangerous nuclear hegemon that poses a potential threat not only to the Middle East but also to Europe. Neither France nor Britain nor Germany can equal Israeli state nuclear weaponisation on both land and sea.

This calculation is based on the fact that the state of Israel is the only WMD state to refuse to be a party to either the Chemical Weapons Convention (CWC) or the Biological Weapons Convention (BWC) which are international arms control treaties that outlaw the production, stockpiling, and use or transfer of chemical or biological weapons and their precursors.

These conventions are administered by the OPCW international, intergovernmental Organisation for the Prohibition of Chemical Weapons based in The Hague, Netherlands to which virtually every U.N. member state is a party, with the exception of Israel.

Furthermore, the state of Israel is the only nuclear weapons state in the world that is undeclared and which is also outside of the inspection of the U.N. and the authority of the Security Council.

It is armed and funded by the joint efforts of the Christian and Jewish Zionist Lobby of the US Congress together with the Trump White House but Israel also receives military equipment and assistance from the UK and some other European states such as Germany.

Chancellor Angela Merkel has unilaterally altered the balance of power in the region by supplying Netanyahu with a fleet of German-built and subsidised, state-of-the-art submarines reported to have been retro-fitted with cruise-missile nuclear weapons. These undersea war vessels of the Israeli navy are uninspected by the UN or the IAEA and are now assumed to be covertly patrolling the Mediterranean Sea and the Iranian Gulf with their dangerous armaments.

We now have the ludicrous position whereby heavily nuclear-armed Israel is accusing non-nuclear Iran of being armed and dangerous in a transparent effort to destroy the Iranian economy. The U.N. Security Council needs to take urgent action before we are all in danger from a nuclear war provoked by Netanyahu with co-operation from the dysfunctional Trump White House.

At this time of writing, Iran is in full compliance with the JCPOA provisions of the EU/UNSC Iran deal and the reason why Netanyahu is peddling such fabricated nonsense before the

U.N. is because he sees the opportunity to persuade a gullible incumbent of the White House to submit to Zionist pressure to bankrupt the Iranian oil industry so that Israel can achieve its dangerous objective of becoming the hegemon of the Middle East.
