How Israeli pricetag terrorism is financed by \$6bn through the AIPAC Lobby in Washington (and raises the possibility of global war in 2016)

The Zionist Council – now known as AIPAC – is the most powerful lobby of American foreign policy ever known. It decides who stands for election to Congress and who gets elected right across all fifty states of the Union.

Effectively, just 20% of the American electorate control the US Legislature and Administration in a process that runs counter to any form of democratic government. It exerts that control by money paid to ensure that virtually no individual who does not support AIPAC's political agenda for Israel is elected to Congress.

It is a complete corruption of the democratic process that effectively disenfranchises over 240m Americans and impacts the lives of billions around the world in the most powerful, long-running, political scam ever perpetrated in the West.

The consequences to the Middle East and to Europe are mind-blowing. The Israeli government virtually controls American global foreign policy both overtly through Mr Netanyahu's direct instructions to Congress and covertly through AIPAC's political machinations in Washington.

The result is effective Israeli command of the White House and the consequent impotency of the elected president. A travesty of democratic government and an insult to justice, morality and civil rights that extends across the world and threatens eventual war with nuclear weapons.

There is no greater threat that faces the world in 2016.
