Pristina: Corruption and unemployment are the biggest problems in Kosovo, a survey by the United Nations Development Program (UNDP) published on Thursday showed.

According to the survey, the most corrupt institutions in Kosovo were the privatization agency, Kosovo Energy Corporation, courts and hospitals. The UNDP said public satisfaction with the work of government, president, prime minister and parliament speaker was declining.

Four years after declaration of independence, unemployment rate ranged between forty and sixty per cent and about 30 per cent of Kosovo's 1.7 million population lived below poverty line, statistics showed.

Most of the people surveyed were unhappy with current economic and social situation and over 80 per cent held the government of prime minister Hashim Thaci responsible, the survey showed.
