What if...? What if the number of Coronavirus cases is not accurate and is actually exaggerated by many times? What if the estimates are based on a flawed computer model? What if the developer of the model has so admitted? What if the death certificates are being modified to show more Coronavirus related deaths than actually exist? What if people who were already dying of serious conditions like heart disease or diabetes or COPD are now being counted as Coronavirus deaths because of the supposed presence of Coronavirus at the time of death? What if hospitals are assuming people have Coronavirus just because they exhibit one or more symptoms, like a cough or fever, even though no actual lab testing is performed (presumptive diagnosis)?

What if the CDC is as wrong about this virus as they were about Swine flu in 1976, or since then the Bird flu, or HIV or SARS or MERS? What if the Swine Flu Vaccine injured more people than the Swine Flu itself and the program had to be stopped? What if you found out that Fauci had very large financial ties to the Pharma agenda to provide vaccines, and that is why he is not mentioning any possible way to treat the flu except vaccines? What if Fauci has close financial connections to Bill (the computer and vaccine salesman) Gates? What if natural immunity from a virus entering your system through the throat is far superior to a synthetic chemical cocktail called a vaccine shot into your body with a needle? What if the alleged COVID-19 deaths were mostly people who were already dying? What if your best defense against all viruses was a healthy immune system? What if inexpensive things like vitamins A, C and D3 could boost your immune system? What if Zinc and Selenium were important to immune health? What if the people who play doctors on TV never mention the importance of vitamins and minerals?

What if "social distancing" really does not stop you from getting the virus, but only slows down the transfer of the virus through the population? What if slowing down the transfer of the virus, is just another way of prolonging the life of the virus and the 'crisis' and the 'panic' and the control of our lives? What if wearing masks does not really stop the virus? What if the virus can enter through your eyes and ears, which are connected to your mouth and throat? What if the virus is simply a seasonal flu, just like every other year, and the crisis is a drastic exaggeration, to intentionally create a panic? What if there really is nothing to fear but fear itself?

What if the FED and the Treasury are bailing out major corporations and banks to the tune of trillions of taxpayer backed fiat dollars, but it's being called a Corona Virus Remediation package? What if you get a \$1,200 check, but then your share of the total bailout debt is 10 or 100 times higher? What if the FED is destroying the value and purchasing power of your dollars and savings and retirement plans, by printing trillions of more money that only benefit the rich and well connected? What if all of our financial markets are rigged? What if

the stock market was about to crash on its own, but the crash is being falsely blamed on the virus?

What if you stopped watching television, and actually started questioning the mainstream reports and did some research for yourself on the internet? What if you found out that there are many credible people and organizations that are questioning the mainstream reports? What if we are being lied to? What if the lies are intentional? What if certain people are going to gain financially from this crisis? What if there are people who will gain power over us from the crisis? What if you went to Youtube and looked up the following people and listened to the information they have about the 'alleged crisis' we are now enduring?

What if their names were DR Ron Paul, and he was calling for Fauci to be fired? Dr John Bergman? Dr Sherry Tenpenny? Dr Joseph Mercola? Dr Bruce Lipton? Dr David Brownstein? Albert E. Carter? Investigative journalists Robert Scott Bell or Del Bigtree or Bill Sardi or Daisy Luther or Lew Rockwell or Jack Kerwick or Jon Rappoport? Or economists and philosophers Doug Casey or Peter Schiff or Catherine Austin Fitz or Dr Greg Mannarino or Max Keiser or Lynette Zang or Larken Rose? What if these people and many others had important information about what's really happening in America and the world that you are not hearing on television or radio programs? What if these people could help you be healthier? Or less fearful? Or happier? Or more Free?

What if we are being bamboozled? What if our nation is being looted while we are staying home and watching the daily fear porn on TV? What if it's all a clever distraction? What if the remaining freedoms and rights we didn't lose after 911 are being stolen from us today in broad daylight? What if our natural rights are being attacked and we are doing nothing to defend them? What if the virus is not our real enemy? What if we are so busy being obedient little sheep that we will wake up too late? What if when we wake up, the America we love is nowhere to be found? What if in the future, when you are old, and the children ask you what you were doing when the Greatest Depression began in 2019 and the Constitution died an ugly death, and all you can tell them is that you were hiding at home from a flu virus and watching reruns of Gilligan's Island?

What if?
