In-depth Report: [UKRAINE REPORT](#)

This is an excellent detailed analysis of the MH17 tragedy by the Russian Union of Engineers which quite frankly illustrates how heavily censored the Dutch "report" is.

We will let you digest this report and come to your own conclusion, which in all likelihood will explain the infamous high velocity projectiles whitewash pumped out by the western "press".

This review was undertaken by experts who not only know the subject matter but have objectively presented evidence that must be considered with the legitimacy that is inherent to it. Here is the overall description of the "Analytical Group" from the report:

A group of experts from the Russian Union of engineers was convened to analyze the situation, including reserve officers with experience in the use of anti-aircraft missile systems, as well as pilots having experience with aircraft weapons. This problem was also discussed at a meeting of the Academy of Geopolitical Problems, where many variants were tested and discussed again. In the course of their analysis the experts used materials derived from public sources, found in the media. The situation was also analyzed using a computer simulation of the Su-25.
