

120 Covid-19 Vaccine Projects are Underway

Will Mass-Vaxxing if Ordered Breach the Nuremberg Code

By [Stephen Lendman](#)

Theme: [Law and Justice](#), [Science and Medicine](#)

Discussing permissible medical practices, the Nuremberg Code mandates consent and prohibits coercion, following Hippocratic Oath principles of doing no harm.

[What is the Significance Of The Nuremberg Code](#)

The Nuremberg Code is one of several foundational documents that influenced the principles of [Good Clinical Practice \(GCP\)](#).

Good Clinical Practice is an attitude of excellence in research that provides a standard for study design, implementation, conduct and analysis. More than a single document, it is a compilation of many thoughts, ideas and lessons learned throughout the history of clinical research worldwide.

Vaccines affects human health — notably when development is rushed like now.

Instead of providing protection as claimed, vaccines time and again cause diseases they're supposed to prevent.

Around 120 COVID-19 vaccine development projects are underway.

Either in pre-clinical or human trials, Big Pharma firms and their foreign counterparts are racing to develop and market what no one should touch when one or more vaccines become available — possibly later this year or in early 2021.

All vaccines with no exceptions contain a toxic brew of harmful to human health substances.

Under normal conditions, vaccine development and testing takes years.

Rushing one or more to market is all about wanting to cash in big on a profit bonanza, potentially worth billions of dollars — regardless of the unacceptable risk to human health.

The World Health Organization (WHO) pushes Big Pharma interests.

It pushes the Big Lie claim that COVID-19 vaccines will protect public health and safety.

It promotes rushing COVID-19 vaccine development to make them available as soon as possible that risks making a bad situation worse.

Its goal is mass-vaxxing around two billion people before end of 2021.

Earlier it defied reality, falsely claiming that “(t)here is currently no evidence that wearing a mask by healthy persons in the wider community setting, including universal community masking, can prevent them from infection with respiratory viruses, including COVID-19.”

Wearing a face mask in public minimizes the risk of COVID-19 infection, along with proper hand-washing, avoiding large gatherings, and overall good health habits that include a healthy diet and daily exercise.

Studies reportedly show that around half of Americans will not permit themselves to be vaxxed for COVID-19, about another 25% hesitant about taking this step.

Anthony Fauci and other US public health officials promote Big Pharma interests — why trusting their advice is hazardous to human health, especially about hazardous to health vaccines, notably for COVID-19 when available.

The 2016 documentary film “Vaxxed: From Cover-Up to Catastrophe” discusses the link between the MMR (measles, mumps, rubella) vaccine and autism.

The film exposes CDC corruption and fraud in deference to private industry profit-making — why it should be called the sickness, not the healthcare, industry.

Health and nutrition expert Gary Null and former senior biotechnology and genomic industries research analyst Richard Gale warned that vaccines are “unsafe at any dose.”

When development is rushed like what’s going on to make COVID-19 vaccines available as soon as possible, they’ll be especially harmful to human health.

No one should allow themselves and family member to be part of a diabolical human experiment that’s all about maximizing Big Pharma profits.

Safety and efficacy claims by the industry and CDC aren’t supported by medical science.

An alarming correlation exists between mass childhood vaxxing and illnesses they experience, as well as autoimmune diseases in adults.

The CDC claim that vaccines are “unavoidably safe” is unsupported by scientific evidence.

No vaccine developed and marketed was safe as claimed.

COVID-19 vaccines when available are virtually certain to be hugely toxic and potentially extremely harmful to human health.

Why it’s essential to just say NO when all-out industry and government efforts push people to get vaxxed.

The Nuremberg Code includes 10 points:

1. Voluntary consent on matters relating to human health.
2. Procedures yielding positive results that benefit individuals and society.
3. Procedures based on positive experimentation results.

4. Physical and mental suffering prohibited.
5. Whatever risks death or disability is forbidden.
6. Risks taken should never exceed sought benefits.
7. Proper preparation in suitable facilities should precede procedures followed.
8. Only scientifically qualified individuals should conduct them.
9. At any time during treatment, individuals may cancel it at their discretion.
10. Scientifically qualified individuals involved must terminate procedures if too high a risk of harm to human health exists.

If ordered ahead in the US or elsewhere in cahoots with drug giants, mass-vaxxing for COVID-19 will be a flagrant Nuremberg Code breach.

The likely irreversible harm to vaxxed individuals will far outweigh claimed benefits that are unsupported by scientific evidence.
