It's the wrong time for US youths with higher education aspirations in mind. On increasing numbers of US campuses, it's hazardous to their health and well-being to enroll at colleges and universities whose policies may irreversibly harm them near-or-longer-term.

After Rutgers in March required students to be jabbed with experimental, high-risk, unapproved, rushed to market, DNA altering Pfizer or Moderna mRNA technology that risks irreversible harm to health, a dozen or more US schools of higher education went the same way.

By mandating the above, they're putting their student body in harm's way — irresponsibly and recklessly endangering them.

Affected students should transfer to a school that respects their health, and legal right to decide all things related to their well-being.

Schools mandating covid jabs are in breach of federal law and the Nuremberg Code.

The former requires that individuals may “accept or refuse administration of” experimental, unapproved drugs.

According to the Nuremberg Code, voluntary consent is required on all things related to health.

By ignoring the above, US schools that require students to be involuntarily jabbed for covid are in flagrant breach of these standards and contemptuous of the health and rights of their student body.

They include Rutgers, Northeastern, Fort Lewis College, St, Edward's, Roger Williams, Nova Southeastern, Brown, Cornell, Yale, Columbia, and Columbia College, Chicago.

My esteemed alma mater Harvard University strongly urges students to be jabbed for covid, short of mandating it so far, saying:

“We continue to strongly recommend that you seek vaccination opportunities from all sources available to you to prevent further delay,” falsely adding the following:

“The safety of (covid jabs) is a top government priority (sic).”

Fact: Polar opposite is true, what Harvard suppressed.

Fact: Government mandates and recommendations since last year are intended to inflict harm on individuals following them, not the other way around.

Fact: They’re all about instituting draconian control.

Fact: Experimental covid mRNA technology and vaccines are bioweapons to depopulate the US and other nations of individuals dark forces want eliminated.

Covid jabs “will help protect you from getting” the viral infection (sic).

Fact: Jabs increase the likelihood of being infected. Harvard falsely claimed otherwise.

“(Y)ou may experience some side effects after receiving the injection (sic).

“This is a normal sign that your body is building protection (sic).”

Fact: Toxic jabs risk serious harm to health and no protection.

Fact: The more jabs, the greater the risk.

Fact: Jabs risk contraction of any number of serious diseases short-term or later on.

Fact: For the elderly with weak immune systems, allergic individuals and others, they can kill.

“The cost of the vaccine is covered by the government.”

Fact: To encourage mass-jabbing, US dark forces are incentivizing uninformed Americans to self-inflict harm.

Covid jabs “are one of many important tools to help us stop this pandemic (sic).”

“Once you’ve received your jab, continue to wear your mask and socially distance in public places (sic).

Fact: No pandemic exists, just normal annual outbreaks of seasonal flu-renamed covid to scare us into self-inflicting harm by following draconian mandates and recommendations.

Fact: Masks don’t protect and risk serious harm to health when worn longterm.

Fact: Social distancing provides no protection. It undermines normal interactions — essential to every day life.

Fact: It’s unnecessary and destructive of interpersonal relations, while providing nothing beneficial.

Voice of America, part of the US worldwide propaganda system, falsely said the following:

“The US Food and Drug Administration (FDA) has approved use of the Pfizer-BioNTech and Moderna vaccines (sic).”

False on two counts! These drugs are NOT vaccines.

They’re hazardous, experimental, unapproved DNA altering mRNA technology — given emergency use authorization when no emergency exists.

According to American College Health Association’s Covid Task Force co-chair Gerri Taylor:

“We would love for all our students to be vaccinated before they go home to either places in the US or places in other countries, because if they go there unvaccinated, they could actually carry the virus to their families and communities (sic).”

All of the above claims are part of the most widespread ever state-sponsored mass deception campaign to convince maximum numbers of unwitting people to follow a high-risk with no reward protocol.

Protecting and preserving health requires rejecting it.

Above all, it’s vital to health and well-being to refuse being jabbed with what’s unneeded and may cause irreversible harm if used as directed.

When I was on campus long ago — circa 1950s — nothing remotely like the above existed.

In college and graduate school, I recall no health-related mandates of any kind.

None should exist today beyond encouraging students not to self-inflict harm by following good health practices — not the other way around like what’s going on today.

A Final Comment

According to draconian Yale and Columbia diktats, students unwilling to be jabbed for covid will be barred from classrooms and prohibited from coming on campus — except for those with medical, religious or other exemptions.

Unacceptable policies instituted by the above colleges and universities may likely be mandated at many others in the coming weeks and months.

Instead of protecting students, they’ll be harmed near-or-longer-term, proving what’s unthinkable.

In the US, higher education is becoming hazardous to students instead of protecting and preparing them for endeavors they seek to pursue.
