

Megalomania - Privilege of the Rich and Powerful? The World Government Summit

Ultimate Globalist Agenda: Elite to Control World Technologies

The World Government Summit (WGS) is an annual event held in Dubai, United Arab Emirates from 13 to 15 February 2023. This year's title slogan was "Shaping Future Governments". The Summit's format is similar to the WEF's at Davos.

The WGS brings together business leaders and politicians, high-level government representatives for a global dialogue about "knowledge" and governmental processes, as well as policies with a focus on the issues of futurism, technology innovation and other topics.

This year's about 10,000 WGS attendees (WEF Davos 2023, about 2,700) included some 300 speakers. One of the more prominent speakers was - who else - Klaus Schwab, founder and eternal CEO and globalist way beyond reason of the World Economic Forum, or WEF, for short.

In his as always exuberant presentation with his signature accent reminiscent of Arnold Schwarzenegger, Schwab bragged, "I wrote in 2015 the book, '*The Fourth Industrial Revolution*'. I mentioned 23 or 25 technologies that will change the world." He went on mentioning some of them. And continued, "The book was considered science fiction, but all those technologies have become realities."

He said these technologies are now exponentially exploding: "*our lives, ten years from now, will be completely different*"; concluding his megallo-speech by saying, "*Who masters those technologies - in some way - will be the master of the world.*"

For a few seconds the camera passes over a row of VIP conference attendees. Their faces, in awe of so much megalomania and so much dystopian departure from reality, speak volumes.

Mr. Schwab's time has come. He is no longer taken seriously. This was already

demonstrated at this year's (16-20 January 2023) traditional Davos WEF meeting. Davos turned out to be not much more than a networking event, a show-off about who is who in this megalo-elite club.

Not even Schwab's elitist "allies", who all come in their individual private jets to such events as Davos or Dubai, not collectively as a group of "think-alike leaders" might continue following the WEF's agenda of sheer madness. They come to the event in Davos to rub elbows and to be seen. See [this](#).

In Dubai a few days ago, Schwab used the same lingo as he did in Davos a month earlier.

He talked about a "fractured world" that needed to be "re-globalized". The eternal Globalist cannot let go of a topic that nobody in his right mind – and especially not 99.9% of the world population is interested in: A globalized world, with a *One World Order* (OWO) Government of which Klaus Schwab sees himself as the Master Emperor on the throne.

[See this](#) related to the Dubai WGS conference and especially the 1:23 min video clip, excerpt of his full speech (16 min video) below.

Schwab and the WEF have become instruments for executing orders of the elite – a visible elite of the usual suspects, the multi-multi "philanthropist" billionaires, who finance and help organize disruptive social movements around the globe, like Woke and the unpronounceable acronym LGBTIQA+ (lesbian, gay, bisexual, transgender, intersex, queer/questioning, asexual; the plus + sign stands for evolving sexual inclinations), BLM (Black Lives Matter), and more.

Such social movements are sheer deviation maneuvers so, people don't pay attention to what's being brewed for the future of humankind behind black curtains.

The invisible corporate financial giants, plus the Silicon Valley Tech-titans, who literally run the world from the shadows of their sinister cult edifice, are those who direct with an iron fist the WEF, WHO, the entire UN system, the FED, World Bank, IMF, Bank for International Settlement (BIS), as well as Washington itself, the Pentagon, NATO and Brussels – the *siège* of the European Union (EU).

Klaus Schwab and his WEF-outfit are generously funded by them – so, he is but a tool to represent and, to the extent possible, impose their will on the world. This elite of darkness wants a globalized world; a One World Order (OWO).

It will not happen. Dynamics of the forces of life will not allow such excesses, risking the destruction of our beautiful Blue Planet.

*

Schwab and the WGS organizers envisage a future of doomsday tenor, see the WGS-issued ["Government in 2071: Guidebook"](#). The issues and constraints listed in the Guidebook of the Future may only be resolved through a World Government, or OWO.

Elon Musk, who joined the conference by video, has a diametrically opposed view.

A world government may end humanity, Musk said, and pledges for maintaining our civilizational *diversity*.

The Tesla Chairman and SpaceX CEO voiced his concern over a single world government as *"it could strip humanity of diversity and precipitate the end of civilization."*

These are valid concerns since the world population is made up of an uncountable multitude of different cultures, subcultures, moral and ethical values, as well as art, all of which would be lost in no time, if people like Schwab and his globalist ilk would have their way.

Musk added, *"We want to avoid creating a civilizational risk by having – and this may seem odd – too much cooperation between governments."*

He explained that historically, different civilizations were separated by distance, so when one went into decline, others could rise. He used Ancient Rome as an example. *"When Ancient Rome fell, Islam rose and managed to preserve much of the Roman knowledge and build upon it"*, Musk said. *"But in a globalized world this may no longer be a viable scenario."*

He went on saying that human civilization *"is like a tiny candle in a vast darkness, and a very vulnerable tiny candle that could easily be blown out,"* urging the WGS audience *"to take great care to avoid humanity being wiped out by some cataclysm"* – man-made, or otherwise.

Perhaps one of Elon Musk's most important warnings addressed Artificial Intelligence (AI). *"One of the biggest risks to the future of civilization is AI."* Musk told WGS attendees.

Musk called upon governments to develop safety regulations for AI, comparing its rise to the development of nuclear technology.

In conclusion, Musk cautioned that **AI and one-world government pose threats to humanity. He suggests that the latter may even end humanity.**

[See this for more details.](#)

These anti-globalist statements by Elon Musk are juxtaposed to Schwab's *megalo-statement* *"Technology can help the elite 'be the master of the world.'"*

There was for sure hardly anybody in the audience who would want to give authority over the array of technologies listed in Schwab's *"4th Industrial Revolution"* – like digitalization of everything, even the human brain to a small elite, on top of it, western elite, in the sense of WEF's world view.

Just imagine, weather and climate geoengineering technologies, such as HAARP, that may weaponize the atmosphere, as well as our planet's continents and seas, in control of some globalist elitists. It is highly likely, though not yet entirely proven, that the gigantic destructive tremor that shook Turkey and Syria in the early morning hours of 6 February, bore HAARP's signature.

Who would want this destructive war weapon in the hands of WEF's elitists, masterminded by their "invisible" rulers and their globalist, eugenicist "front" actors, the likes of Schwab, Gates, Rockefeller, Soros *et al!*

May God save us from the Death Cult.
