Russia has now shown its satellite pictures and radar information from the Donetsk, Ukraine region during the July 17, 2014 Malaysia Airlines flight MH17 crash.

The Wall Street Journal reported in its article, "[Russia Presents Its Account of Malaysia Airlines Flight 17 Crash](#)," that:

Russia's Defense Ministry on Monday presented its first detailed account of the final moments of Malaysia Airlines Flight 17, saying Russian radar had spotted a second aircraft in the vicinity shortly before the crash and that satellite imagery showed Ukraine had moved missile systems into the area before the incident.

At a news conference, air force chief Igor Makushev didn't say who the ministry thought had fired the missile that apparently brought down the airliner on Thursday.

The Wall Street Journal also reported:

In an elaborate presentation displaying radar and satellite imagery, Mr. Makushev said it was likely that the second airplane was a Ukrainian fighter jet. He also showed satellite photos allegedly portraying several Buk ground-to-air missile systems in the area close to where the plane crashed. The systems, he said, could only belong to the Ukrainian military. Ukraine has accused Russia of giving the rebels a Buk system, with which they then shot down the passenger jet.

Mr. Makushev said the airplane deviated from its course by 14 kilometers, but then attempted to return to its course, before crashing shortly after.

He said Russia is prepared to hand all of the information it has to European authorities, which included satellite imagery and data from its own radars.

Indeed, the evidence suggested Kiev's regime deployed anti-air missile systems in Donetsk in and around the area where flight MH17 crashed. They also provided information regarding Ukrainian warplanes trailing flight MH17, the possibility of an air-to-air attack on

MH17, and inconsistencies with Ukrainian air traffic control.

There were a series of questions asked throughout the presentation - nothing was "concluded" - which is in direct contrast to the West which has shown the world nothing in terms of evidence, [but has drawn many inflammatory, politically-motivated conclusions](#). Russia has shown a great deal of evidence directly contradicting the West's baseless claims. Now it's time for the Pentagon to show the world their pictures and data along with their explanations.

The following video is presented in both Russian and English:
