Towering above all the many scandals spawned by the manufactured COVID crisis is the global proliferation of deaths, sicknesses and injuries resulting from the mass injection of various mRNA/ lipid nanoparticle concoctions. These concoctions, whose full array of variable ingredients is still being kept secret from the public, are the first media of genetic modification ever imposed systematically on humans.

This experiment, much of it done secretly and under the auspices of the US Department of Defense, is inflicting a terrible toll on the health, longevity and wellbeing of a significant portion of the global population. See [this](#).

The mRNA injections induce genetic alterations that stimulate the mass production of pathogenic spike proteins well known for causing blood clots, myocarditis, heart attacks and strokes. These and many other so-called "adverse effects" are much more numerous and many-faceted than is being admitted by governments and by the censorious legacy media.

The ongoing cover up is adding to the scale of the massive harms being done. Even yet the lie of safety and effectiveness is causing too many of us to roll up our sleeves for yet another natural-immunity-destroying booster.

This holocaust in the making is part of an array of human-made COVID catastrophes crying out for many penetrating investigations into the most monumental case of medical fraud in all of recorded history. Florida Governor Ron DeSantis is answering this call.

Governor DeSantis announced a pioneering foray into the realm of criminal investigations reflecting the growing recognition that many things are going horribly wrong with initiatives done in the name of fighting COVID-19.

On 13 December DeSantis stepped forward to say,

“Today, I’m announcing a petition with the Supreme Court of Florida to impanel a statewide grand jury to investigate any and all wrongdoing in Florida with respect to the COVID-19 vaccines. We anticipate that we will get approval for that.” See [this](#).

The primary investigators are to be drawn from the Florida Department of Law Enforcement. This Department is empowered to seek the assistance of local law enforcement entities and agencies in Florida.

The Florida Governor highlighted particular suspicions about the role of pharmaceutical companies. He asserted that “an investigation is warranted to determine whether the pharmaceutical industry has engaged in fraudulent practices.”

A big part of the suspected fraud involved the purposeful spread of misleading information that the COVID mRNA injections have the capacity to stop the transmission of the novel coronavirus. In reality, the COVID injections are incapable of serving that purpose. In his petition DeSantis continued

“There is good and sufficient reason to deem it to be in the public interest to empanel a statewide Grand Jury to investigate criminal or wrongful activity in Florida relating to the development, promotion and distribution of vaccines purported to prevent COVID-19 infection, symptoms, and transmission.” See [this](#).

The petition provided some examples of where investigators might look to find the kind of criminal activity that would be put before the Grand Jury. The possible crimes might involve

“Individuals, persons, and entities, including, but not limited to, pharmaceutical manufacturers (and their executive officers) and other medical associations or organizations involved in the design, development, clinical testing or investigation, manufacture, marketing, representation, advertising, promotion, labeling, distribution, formulation, packing, sale, purchase, dispensing, prescribing, administration, or use of vaccines purported to prevent COVID-19 infection, symptoms, and transmission”

The COVID Investigations in Florida and Ottawa

The investigation taking shape in Florida to explore the criminal aspects of the manufactured COVID crisis is very different from the COVID-related investigation underway now in Ottawa. The Canadian investigation taking place in Ottawa has been transformed into a very partisan effort on the part of the Trudeau government to smear and criminalize the most effective critics of federal COVID policies. See [this](#).

The core group that created and implemented the strategy to publicize the grotesque failures of Canadian officialdom in the WHO-declared pandemic are now known around the world as the Freedom Convoy of Truckers. In mid-February of 2022 the Trudeau government declared the Canadian version of martial law in the quest to dislodge the Truckers from their parking protest in Ottawa.

The ostensible reason for the current Emergency Act Inquiry led by Justice Paul Rouleau is to investigate the justification for the actions taken against the Truckers last February.

The inquiry into the federal invocation of the Emergency Act is taking place before there has been any real reckoning with the broad array of major catastrophes unjustifiably imposed on people in Canada and around the world. The Truckers and their supporters sought with some success to initiate such a reckoning. Their immediate aim, one that continues to inspire a global resistance movement, was to slow down the onslaught of damage being done under the cover of fighting COVID-19.

The Rouleau Commission has found itself in an awkward position because the Emergency Act Inquiry created a means for the federal government to downplay its own failures. The Trudeau government's strategy has been to use the episode to point attention away from its own responsibility for the unnecessary emergencies it both created and compounded.

What will it take to get the federal government to present some sort of public acknowledgment of its own instrumental role in creating large-scale unemployment, ruinous business closures, ongoing suicides, domestic violence, and breakdowns in supply chains all produced by the useless lockdowns?

When will the responsible authorities including those in the Trudeau government cease to pretend they have no role at all in the proliferation of the deaths, sicknesses and injuries that flow from the mass distribution of the gene-modifying COVID clot shots?

Unfortunately Canada's Emergency Act Inquiry presents a number of examples of what not to do in investigating the trials and tribulations of the WHO-declared pandemic. The Rouleau Commission, however, is serving to get some crucial procedural wheels rolling.

Hopefully the kind of constructive energies still being generated by the inheritors of the Freedom Convoy movement in Canada can be pointed towards objectives that match and transcend those of the Grand Jury process being set up in Florida. Perhaps Alberta's new Premier, Danielle Smith, will continue to follow the lead of DeSantis. She is well on her way to becoming a pivotal leader in restoring some measure of good health to our abused peoples and to our tattered institutions.

Premier Danielle Smith confirms it will soon be illegal to discriminate in Alberta based on COVID vaccine status.

She tells business leaders that have such policies to work her with to bring their practice in line with hers. [#yeg](#) [#Yyc](#) [#ableg](#) <https://t.co/V2VbHZMIT0>

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
