

North Korea: Achievements in Health and Education

By [Prof Michel Chossudovsky](#)

Global Research, August 16, 2017

The North Korean government, according to the Western media is said to be oppressing and impoverishing its population.

According to [US News and World Report](#), "North Korea is one of the most miserable places on earth. The standard of living has deteriorated to extreme levels of deprivation in which the right to food security, health and other minimum needs for human survival are denied,"

"Here in the USA we have medicare, all our kids are educated, we are all literate, and "we want to live in America".

And in the DPRK, the health system sucks, they don't have schools and hospital beds, they are all a bunch of illiterates,

You would not want to live there! "(Author's paraphrase)

Beneath the mountain of media disinformation, there is more than meets the eye. Despite sanctions and military threats, not to mention the failed intent of "respectable" human rights organizations (including Amnesty International) to distort the facts, North Korea's "health system is the envy of the developing world" [according to the Director General of the World Health Organization](#):

"WHO director-general Margaret Chan said the country had "no lack of doctors and nurses"".

The World Health Organization (WHO) says a report on North Korea's health system by Amnesty International is unscientific and outdated.

Rights watchdog Amnesty said North Korea was failing to meet its people's most basic healthcare needs.

Amnesty's report is based on interviews with 40 North Korean defectors and foreign health care workers.

In April, the WHO's director visited North Korea and said its health system was the envy of the developing world.

WHO director-general Margaret Chan said the country had "no lack of doctors and nurses".

Health. DPRK vs. USA

While praising North Korea, the WHO admonishes the USA for "not having a universal health coverage":

"The USA is also the only country in the OECD (Organization for Economic Co-operation and Development) without universal health coverage, and has the largest share of unmet health-care needs due to financial costs. Not only does the USA have high and rising health inequalities, but also life expectancy has stagnated or even declined in some population subgroups," the research document said.

"Therefore, the poor recent and projected U.S. performance is at least partly due to high and inequitable mortality from chronic diseases and violence, and insufficient and inequitable health care."

Screenshot [CNBC Report](#), February 2017 quoting a study by the WHO and Imperial College London

Lets look at the figures. [The Library of Congress Federal Research Division](#) quoting official sources concurs:

North Korea has a national medical service and health insurance system. As of

2000, some 99 percent of the population had access to sanitation, and 100 percent had access to water, but water was not always potable. Medical treatment is free. In the past, there reportedly has been one doctor for every 700 inhabitants and one hospital bed for every 350 inhabitants

“In 2006 life expectancy was estimated at 74.5 years for women and 68.9 for men, or nearly 71.6 years total.”

Higher than in most developing countries. Lower than in the United States.

COUNTRY PROFILE: NORTH KOREA

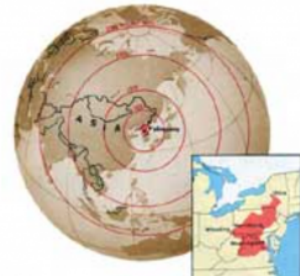

July 2007

COUNTRY

Formal Name: Democratic People’s Republic of Korea (DPRK; Chosŏn Minjujuŭi Inmin Konghwaguk).

조선 민주주의 인민 공화국

Short Form: North Korea (Chosŏn) 조선

Can we trust official US-UN sources?

In America we have medicare.

Education: DPRK vs. USA

What about their run down schools, serving an illiterate North Korean population?

According to UNESCO, Public Education in the Democratic People’s Republic of Korea (DPRK) is universal and fully funded by the State. According to US official government sources (Library of Congress Federal Research Division):

“Education in North Korea is free, compulsory, and universal for 11 years, from ages four to 15, in state-run schools. The national literacy rate for citizens 15 years of age and older is 99 percent. ([Library of Congress, Federal Research Division](#), p. 7)

In contrast in the USA, according to the [US Department of Education Surveys](#), the Adult Illiteracy rate (16 and older) is of the order of 13.6% and 14.5% depending on the criterion (2003 data).

There is a 99% percent adult literacy rate in North Korea compared to about 86% in the USA.

That sounds crazy! Who is fiddling with the data? These are all official UN-US statistics.

Overview

- [Background](#)
- [Literacy Levels](#)
- [Small Area Estimation Method](#)
- [Estimates of Adults Lacking Basic Prose Literacy Skills \(BPLS\)](#)

Background

"The national direct estimates of the percentages of adults lacking BPLS (Basic Prose Literacy Skills) are 14.5 percent for the 2003 NAAL and 14.7 percent for the 1992 NALS. In comparison, the national direct estimates of the percentages Below Basic in prose literacy are 13.6 percent for the NAAL and 13.8 percent for the NALS. UN Security Council Resolutions:

825 (1993) • 1695 (2006) • 1718 (2006) • 1874 (2009) • 1928 (2010) • 1985 (2011) • 2087 (2013) • 2094 (2013) • 2270 (2016) • 2321 (2016)

[UNSC Sanctions Committee on North Korea](#)

Educational achievement measured in terms of adult literacy in the DPRK is higher than in the United States of America?

And how did they reach this performance with an economic sanctions regime extending over a period of more than 20 years?

History: Up to thirty percent of the population of North Korea was killed during the Korean War (1950-53)

Just a couple of additional statistics concerning "life expectancy" in the DPRK resulting from US led wars (1950-53), not to mention Trump's "fire and fury".

"After destroying North Korea's 78 cities and thousands of her villages, and killing countless numbers of her civilians, [General] LeMay remarked, "Over a period of three years or so we killed off - what - twenty percent of the population." (See War Veteran Brian Willson. [Korea and the Axis of Evil](#), Global Research, April, 2002)

According to Dean Rusk, who later became secretary of state, the US bombed "everything that moved in North Korea, every brick standing on top of another."

It is now believed that the population north of the imposed 38th Parallel lost nearly a third its population of 8 – 9 million people during the 37-month long “hot” war, 1950 – 1953, perhaps an unprecedented percentage of mortality suffered by one nation due to the belligerence of another.” (See Brian Willson. [Korea and the Axis of Evil](#), Global Research, April, 2002)

Even Newsweek tacitly acknowledges that the US committed extensive war crimes against the Korean people:

Two, according to a 2009 study by *the Asia-Pacific Journal*.) In a 1984 interview, Air Force Gen. Curtis LeMay, head of the Strategic Air Command during the Korean War, claimed U.S. bombs "killed off 20 percent of the population" and "targeted everything that moved in North Korea." These acts, largely ignored by the U.S.' collective memory, have deeply contributed to Pyongyang's contempt for the U.S. and especially its ongoing military presence on the Korean Peninsula.

"Most Americans are completely unaware that we destroyed more cities in the North than we did in Japan or Germany during World War II... Every North Korean knows about this, it's drilled into their minds. We never hear about it," historian and author Bruce Cumings told *Newsweek* by email Monday.

Screenshot Newsweek 4 May 2017

While *Newsweek* in this article is telling the truth, more generally the US media has failed to inform Americans regarding the extensive war crimes committed against the Korean people by successive US administrations.

Collective Memory of the People of North Korea

It is not in America's collective memory as pointed out by *Newsweek*, but it is certainly in the collective memory of the people of the DPRK.

There is not a single family in North Korea which has not lost a loved one during 37 months of extensive US carpet bombing (1950-53). Put yourself in their shoes.

Pyongyang capital of North Korea, in 1953, almost entirely destroyed by U.S. bombing during the Korean War.

Pyongyang today, rebuilt.

Pyongyang today rebuilt: Dispels the myth of a backward urban society. Trump wants to reduce Pyongyang to rubble.

Do the Pyongyang towers (see image above) compete with Manhattan's Trump Tower? Ask Donald Trump.

WE NEED AN ORGANIZED AND UNIFIED PROTEST MOVEMENT ACROSS THE LAND,
NATIONALLY AND INTERNATIONALLY

SAY NO TO TRUMP'S "PR-EMPTIVE" NUCLEAR WAR AGAINST NORTH KOREA.

SAY NO TO WORLD WAR III.

CALL FOR THE US TO SIGN A PEACE AGREEMENT WITH NORTH KOREA.
