[Big Tech's Effort to Silence Truth-tellers: Global Research Online Referral Campaign](#)

Recently I attended the funeral of one of my former patients, a remarkable woman for very many reasons. She was in her late 50's and she suffered from several significant chronic illnesses, so her death was not unexpected. I am not at liberty to reveal anything that could lead to her identification of course, but I can say that in addition to long-standing physical problems she had what we in psychiatry like to call a 'major mental disorder'.

Unfortunately the 'system' did not do a very good job with her — the system of basic psychiatric care — and she suffered as a result. When I took over her care we were able to develop a very solid partnership and she had a long period of mental and emotional stability before she passed away. But this is not the subject of my report, though perhaps in future I will weigh in with observations about general psychiatry and some glaring shortcomings.

I will add, however, that she was one of the few patients in my care who spoke openly to me about not wanting to take the covid jab.

As the service began, stirring up memories and appreciations, the man sitting to my right turned to me and said,

"An awful lot of people have been dying in their 50's lately." I nodded in affirmation, and he followed this up with "I thought I could count on getting into my 70's, but I guess not."

There was an air of resignation, an acceptance of a new 'reality' in the way he spoke to me.

I said something to the effect that this wasn't normal and I also remarked that I had a theory about what was happening, but the time and place were not conducive to a discussion: we were there after all to pay homage to the deceased. I made the assumption that he would

have dismissed my 'theory' — but who knows?

I conclude from his brief aside that a regular fellow like the man beside me has begun to notice something disquieting, and that others too are noticing. Will they however move along a trajectory of new expectations, or will they make the connection as [Denis Rancourt and others have between the covid jab and excess morbidity and mortality?](#)

My friend Ed Curtin, in an enlightening essay on '[coincidences](#)' calls attention to one facet of propaganda that is often overlooked, namely, the inculcation of convictions based on slow and steady processes, through imperceptible influences and relentless repetition over time.

I've had the impression that the covidian onslaught has been purposefully benumbing us and inuring us to a strange new world of earlier death. We're meant to believe it's normal for kids to have heart attacks, for athletes to drop dead on the playing field in unaccustomed numbers, for aggressive and untreatable cancers to emerge of a sudden.

What would have been unthinkable not so long ago is strangely coming to be accepted as the way things are. Back in the 70's, it took a mere 50 deaths for the Swine Flu vaccine to be stopped in its tracks. But for the covid jab juggernaut the association of millions of fatalities is as nothing.

Ben Franklin [once wrote that the only certainties of life were death and taxes](#). I wonder whether the man to my right today has silently amended this famous utterance to 'early death and taxes'. Or whether four hard years under the covid propaganda machine have not permanently lowered his expectations, and that he will be curious enough about what is happening to the friends and acquaintances around him to start asking a few questions.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
