Region: [Middle East & North Africa](#)

Theme: [Militarization and WMD](#)

In-depth Report: [Nuclear War](#)

Warning: Saudi Arabia, although a signatory to the Nuclear Weapons Non-Proliferation Treaty has just, in violation of its pledge, acquired atomic bombs from Pakistan.

“We have nuclear bombs”: this is what was said on February 19 on *Russia Today* by the Saudi political analyst, Daham al-Anzi, de facto spokesman for Riyadh.

He repeated it on another Arab channel. Saudi Arabia had already declared [[1](#)] its intention to acquire nuclear weapons from Pakistan (not a signatory to the Non-Proliferation Treaty), of whom it finances 60% of the military nuclear program. Now, through al-Anzi, the Saudis have indicated that they started buying them two years ago. Of course, for Riyadh, this is to confront the “Iranian threat” in Yemen, Iraq and Syria, where “the Russians aid Assad.” That is to say, where Russia supports the Syrian government to free the country from Daesh (Islamic state) and other terrorist groups, financed and armed by Saudi Arabia as part of the US / NATO strategy.

Riyadh has over 250 fighter-bombers with dual conventional and nuclear capability, provided by the US and by the European powers. Since 2012, Saudi Arabia is part of the “Nato Eurofighter and Tornado Management Agency,” the NATO agency that manages European Eurofighter and Tornado fighters, of which Riyadh bought from Britain twice the number of that of the whole Royal Air Force.

In the same context, enter the imminent 8 billion EUR maxi contract - thanks to Minister Roberta Pinotti, efficient sales representative for the supply of weapons - to supply Kuwait (ally of Saudi Arabia) with 28 Eurofighter fighter Typhoons, built by a consortium including Finmeccanica with British, German and Spanish industries. This is the largest order ever obtained by Finmeccanica whose coffers will absorb half the 8 billion. Guaranteed with 4 billion in funding by a pool of banks, including Unicredit and Intesa Sanpaolo, and the group Sace Cassa Depositi e Prestiti.

And thus accelerates the conversion of military Finmeccanica, with outstanding results for those who enrich themselves with war: in 2015 Finmeccanica share value grew by 67%. Right in the face of the “Arms Trade Treaty” ratified by parliament in 2013, which states that “no State Party shall knowingly authorize the transfer of arms if the weapons could be used for attacks against civilian targets or subjects, or for other war crimes.” Faced with the denunciation that the weapons provided by Italy are used by Saudi and Kuwaiti air forces for the massacre of civilians in Yemen, Minister Pinotti replies: “Let us not transform the states

that are our allies in the battle against Daesh into enemies. This would be a very serious mistake. ”

This would be especially a “mistake” to allow it to be known who are our “allies” Saudi and Kuwaiti: absolute monarchies, where power is concentrated in the hands of the ruler and his family circle, where parties and trade unions are banned; where immigrant workers (10 million in Saudi Arabia, about half of the labor force; 2 million to 2.9 million people in Kuwait) live in conditions of exploitation and slavery, where those who call for the most basic human rights are hanged or beheaded.

In these hands, “democratic” Italy places bombers capable of carrying nuclear bombs, knowing that Saudi Arabia already has them and that they can also be used by Kuwait.

At the “International Humanitarian Law Conference,” minister Pinotti, after stressing the importance of “respecting the norms of international law,” concluded that “Italy is a immensely credible and respected country.”
