Forcing young healthcare students to take COVID-19 vaccines by mandating them under the threat of being thrown out of school, remains one of the greatest crimes committed during the COVID-19 pandemic.

We need to see criminal charges brought against all University and College leaders who were involved in the decision making and implementation of COVID-19 vaccine mandates in 2021 and 2022.

June 22, 2023 - Provo, UT - 27 year old Keyon Snow, a nursing student at Joyce University, died suddenly in his sleep.

This is [Katie McKell Enos](#), Becca's sister, it breaks all of our hearts to have to make this announcement..

My sweet sister lost the love of her life, her very best friend ❤️ Our beloved Kenyon Clinton Snow unexpectedly passed away on Thursday June 22, 2023. Kenyon was a great husband, brother, son, and friend to those around him. He leaves behind is wife, Becca McKell Snow who loved him immensely. We are all devastated by Kenyon's sudden loss. We want to give Kenyon the memorial he deserves, to honor his memory and wonderful life and say our last goodbyes.

We are currently asking for donations to help cover the cost of Kenyon's funeral, medical bills, and help alleviate Becca's financial burden during this incredibly hard time. Anything, no matter how big or small, will help. Thank you ❤️

Our hearts are broken with the loss of our sweet grandson Kenyon Clinton Snow. His life was cut way too short. This is one of my favorite pictures of Clint and his little family. Kenyon and Clint were buddies from the very beginning of Kenyon's existence here in this life until the very end. The two of them had traveled to Denver to enjoy a little father-son activity and watch a baseball game at the Rockies Stadium. They arrived on Wednesday, June 21st, and on the morning of June 22nd, he was gone. So sudden and such a shock to us all. We feel so blessed to have had this sweet, wonderful spirit with us for the 27 years he was here. He leaves a sweet little wife who has been his brick through everything for seven years of marriage. We love her and

June 10, 2023 – Knoxville, TN – 18 yo Caileigh O'Donohue Duggan, a nursing student at University of Tennessee nursing program died suddenly on June 10, 2023. She died in her sleep, due to an “undiagnosed heart condition” – very likely COVID-19 vaccine myocarditis.

Fontbonne Hall Academy graduate Caileigh O'Donohue Duggan died June 10 at age 18.

According to the school's Facebook page, Duggan “passed away suddenly but quietly this weekend.”

The Breezy Point resident graduated from the Shore Road school last year and also graduated from Visitation Academy in 2018.

She had just finished her first year in the University of Tennessee's nursing program.

“She loved her dream school and dove headfirst into all the activities associated with being part of her Delta Gamma sorority family,” her obituary says. “Her goal was to become a pediatric oncology nurse and her departure is a huge loss to her expected future patients and families for whom she would have given her ultra special love and empathy.”

This is my niece, Mikayla Sherrill. She passed away yesterday suddenly. She was a beautiful person both inside and out. She was a honor student at West County high school and graduated as salutatorian. She went on to St. Louis college of pharmacy where she should have graduated next year. She also ran cross country at the college. Yesterday she was 12.5 miles into a 13 mile mini marathon and collapsed. I posted yesterday but just asking for prayers and had many people asking questions. I don't have any answers to the questions because we all have questions as well. We can't make any sense of this. She was 22 years old and had her whole life in front of her. Keep our family in your thoughts and prayers, especially her mom and dad Matt and Sharon Sherrill her brother and sister Michael and Lilly Sherrill and her sister in law Summer Sherrill. Keep your kids close, hug them and tell them you love them because tomorrow is not guaranteed.

April 26, 2023 – Southport, UK – 31 year old nursing student Ashleigh De Andrade returned from holiday, felt unwell, had a brain bleed, several seizures & died suddenly.

A 'beautiful' mum-of-three who had 'big plans' for her future including getting married tragically died suddenly after waking up from a nap 'sweating'.

Ashleigh De-Andrade, 31, had started feeling unwell after returning home from a break away with her family at a Haven holiday park. She had gone for a nap but woke up hours later with a temperature. She was rushed to hospital where she suffered several seizures and was put into an induced coma before passing away on April 26, aged just 31.

Just days before, everything was normal. The mum-of-three had taken smiling holiday snaps with her fiancé Jordan Nimmo and three sons Jacob, 12, Noah, 10, and Lewi, three and was hoping to get married next year.

It was later confirmed that Ashleigh, who was in her second year studying to become a mental health nurse, had suffered an unexpected bleed on the brain.

Speaking to the *Manchester Evening News*, her close friend Lauren Guest, 25, said Ashleigh was a 'beautiful person' with 'big plans for her future', including getting married to fiancé Jordan, her partner of 17 years, and finally qualifying as a mental health nurse.

"There aren't enough words to describe her as a person. She was such a beautiful person, inside and out, who would do anything for anybody," she said.

When we hear somebody has passed away we pause for a moment, and we say "Inna Lillahi wa inna ilayhi raji'un" and usually we move on. This time "Umayr passed away", these words have been stuck in my mind and I still can't comprehend these three words.

My nephew Umayr Ali 24 years old, second year medical student, has passed away due to a sudden cardiac arrest in his sleep.

Our lives have changed a lot, everyone is struggling. It feels like that we are living in an alternate reality.

After my kids, I helped take care of him as a baby, sang lullabies and changed his diapers. It hurts too much. I know that he has gone forever but I don't want to believe it.

It is such a difficult time and will be very hard for everybody in the future too.

Dec. 20, 2022 – 25 year old Dr. Lindsay Ann Heck, a pharma student at University of Pittsburgh, died suddenly from "unknown causes".

Leslie Soule

The Gateway Pundit is reporting that, "A pharma student at the University of Pittsburgh died suddenly on December 20, 2022. Dr. Lindsay Ann Heck, 25, died suddenly from an 'unknown cause' in December. 'Lindsay was the light of everyone's life; her smile lit up a room and her laughter was contagious. She was a loyal friend and trusted confidante to everyone she loved. Lindsay loved fiercely and lived her life always putting others before herself,' according to her obituary. 'She was the valedictorian of her Class of 2016 at Tunkhannock Area School District. She then received a Doctorate of Pharmacy degree from the University of Pittsburgh in May of 2022, where she graduated summa cum laude. She was a fellow at the University of Pittsburgh School of Pharmacy in the Community Pharmacy Practice Development and Research Fellowship. She loved teaching students, doing research, running multiple vaccine clinics and sharing her passion and knowledge."

My Take...

Each of these deaths should be forensically investigated as a homicide, and if it is determined that COVID-19 vaccines were a contributing factor in the deaths, all those University and College leaders who implemented COVID-19 vaccine mandates should be criminally prosecuted and sentenced to long prison terms.

No student should ever have been forced into taking experimental pharmaceutical interventions, while under threats of suspension from their program.

10 Canadian medical students are dead in the 2 year rollout of COVID-19 vaccines. All of them were COVID-19 vaccinated. All of them were forced to be.

Some of these deaths were suicides. In these cases the key question is: was the COVID-19 vaccine spike protein present in the brain and how much neurological damage did it cause?

COVID-19 vaccines cause neurological and mental health injuries and increase the risk of

suicide as well.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
