Open Letter to the College of Physicians and Surgeons of British Columbia Regarding a Fine British Columbia Physician: Dr. Charles Douglas Hoffe

Dr. Charles Hoffe has been a physician in the Lytton community of British Columbia for nearly 30 years, looking after a largely native community after having gained his medical schooling from the University of Witwatersrand, [the second ranked clinical medical university in South Africa](#).

A citation has been issued by the College of Physicians and Surgeons of British Columbia against Dr. Hoffe for (allegedly) publicly spreading misleading information by:

- a) recommending Ivermectin for Covid-19
- b) saying Covid vaccines can cause microscopic blood clots, and
- c) saying that vaccinated persons can cause harm to unvaccinated persons.

I, Elizabeth Woodworth, a retired health sciences librarian who delivered medical literature to the BC Ministry of Health for 25 years, including the Provincial Health Officer and all the regional health officers and the public health nurses, mental health professionals, nutritionists, dental staff and others, wish to point out some of the peer-reviewed literature that has been tragically overlooked by many public health agencies during this pandemic. Dr. Hoffe, on the other hand, is aware of this literature.

First, although there has been a sustained Big Pharma and media campaign against Ivermectin, the wonderful multi-faceted anti-viral drug that was awarded a [Nobel Prize in 2015](#), and is on the [WHO list of essential medicines](#), there are currently [95 published studies from 1,023 scientists](#) attesting to its efficacy with regard to Covid-19.

Some [20 countries have included Ivermectin in their COVID-19 management strategies](#). It is [available over-the-counter in South American countries](#), and as of now, also in [Tennessee](#).

Seldom if ever mentioned in the media is that [the FDA cannot legally grant an Emergency Use Authorization](#) for an experimental drug or vaccine if an “adequate, approved, and available alternative” already exists.

Second, it is now well established in the [medical literature](#) that blood clots are caused in some mRNA-injected people for Covid-19.

Third, regarding the question of the vaccinated causing harm, since the mRNA injections [do not stop transmission of Covid-19](#), the vaccinated frequently infect the unvaccinated.

Dr. Hoffe has received thirty-two 5-star ratings from his patients online at

<https://www.ratemds.com/doctor-ratings/40188/Dr-Charles-Hoffe-Lytton-BC.html/>

Finally, regarding the big money behind some of the Covid-19 strategies, epidemiologist Dr. Harvey Risch, emeritus Prof. of Medicine and Public Health at Yale University, long-time on the editorial board of the *Amer. J. Epid.*, and who has *no financial connections to Big Pharma*, has written extensively in *WSJ*, *Newsweek*, *Washington Examiner*, *Washington Times*, and many others about the corruption of the CDC and FDA, who along with the [now-corrupted WHO](#), have led the Covid-19 response.

Elizabeth Woodworth
Head Librarian
B.C. Ministry of Health (1978-2002)
Victoria, BC
