DNA coding in your digital ID – soon to come to your home? If you don't like it, the military may inject it into your digital ID chip, somewhere under your skin.

The DNA is the most intimate part of our life's identity.

Is the idea far-fetched?

Not so far.

If WHO gets its ways with the "Pandemic Treaty" overruling this planet's every country's health sovereignty, you may soon be forced to get your most intimate ID, your DNA, "branded" onto your digital ID.

Imagine! Klaus Schwab's (World Economic Forum) joy!

A step closer to absolute and total control.

Don't sweat it. Neither the **Pandemic Treaty** nor the Digital ID has been "worldwide approved". It's so far just talk. Scare-talk. And you know, fearful people submit much easier to tyrannical rules, than self-assured men and women – who know who they are, and who are self-assured, despite the 24/7 "social engineering of the masses".

That's the name of the game. And we can resist it. We are many, they are few.

But very importantly, we need to wake up from our comfort slumber, look reality in the eyes and say NO, in unison and solidarity.

According to a press release on 18 January 2023, Veridos GmbH, headquartered in Berlin with operating facility in Munich, just announced "*Innovatrics*" as Strategic Partner for Advanced DNA ID Verification.

Veridos calls itself “A world-leading provider of integrated identity solutions. Governments and public authorities in more than 100 countries trust the company’s uniquely comprehensive product portfolio.

“The company creates end-to-end solutions and services perfectly tailored to meet every government’s identity need. These range from paper to security printing, electrical chip components, enrollment, identity management systems, personalization and issuance, mobile ID solutions, and border control solutions including eGates.

“Governments can acquire best-in-class passports, ID cards, driver’s licenses, and more, or even the facilities to manufacture their own.”

Innovatrics is based in the European Union (EU), with Headquarters in Bratislava, Slovakia.

The company calls itself “an independent EU-based provider of trusted biometric solutions for governments and enterprises.”

It boasts that “our algorithms consistently rank among the fastest and most accurate in fingerprints and face recognition. For over 16 years, we have partnered with all types of organizations to build trusted and flexible biometric identification solutions. Our products are being used in more than 80 countries, benefiting more than a billion people worldwide.

Biometrics is this “thing” that you don’t know where it begins and where it ends - and you have no clue what’s “in it”.

The pair calls it a **Strategic Partnership for Advanced DNA ID Identification**. The Veridos – Innovatrics joint venture name their invention a “holistic **VeriDNA** solution elevating civilian use of DNA IDs to the next level. This marks a turning point in the DNA-based identification and verification of individuals which has long been used only in the field of forensics.”

Innovatrics has a long experience in ABIS (Automated Biometric Identification System) technology which allows government agencies to store biometric data of all types, such as fingerprints, iris scans and facial geometrics, and compare them with biometrics from checkpoints at lightning speed.

Wow! That’s precisely number one on Klaus Schwab’s wish list to tag every one of the surviving humans. “Surviving” because after the massive population reduction, part of the WEF’s Great Reset and UN Agenda 2030, also according to Schwab’s, Soros’, Gates’, Rockefeller’s *et al*, the production and implantation of DNA IDs may be faster and more efficient, then “stamping” today’s 8 billion people.

The Veridos’ and Innovatrics’ dream would allow VeriDNA generated DNA-IDs taking verification of individuals to a new dimension – offering benefits in sensitive areas such as border crossing, behavior control, as well as monitoring people’s cashflow, food intake and – listen well – **controlling individuals environmental and climate footprints**.

If there is any serious message coming out of the currently ongoing 2023 WEF in Davos, it is a “climate tyranny”. If you don’t believe it, just listen to John Kerry, Biden’s climate envoy to

Davos, speaking like an Avatar from a different planet.

Kerry's words,

"When you start to think about it, it's pretty extraordinary that we – a select group of human beings, because of whatever touched us at some point in our lives – are able to sit in a room and come together and actually talk about saving the planet."

United States climate envoy John Kerry tells the World Economic Forum that the "select group of human beings" in Davos are talking about "saving the planet," even if that sounds "crazy, tree-hugging, leftie, liberal do-gooder."

— Andrew Lawton (@AndrewLawton) [January 17, 2023](#)

Unfortunately, during the past several decades people's minds have been so radically geoengineered through organizations like the little-known UK-based "Tavistock Institute" and the Pentagon-linked DARPA, and possibly others, to have them fully believe the totally anti-science climate hoax.

A DNA-tracing tool is perfect for the globalist elite's goals. In warp speed you identify the misbehaviors, creating a permanent ambiance of fear, a subdued society under permanent climate lockdown and glanced upon from the high-above cruising private jets of the super-billionaires.

Let's hope it will just remain a dream – a fading dream – of the wannabe tyrants because We, the People, will not let it happen.
