“As of 1986, only 12.8% of American kids had chronic diseases. That number has grown to 54% among the vaccine generation (ie, Generation V, those children born after 1986) in lockstep with the CDC’s and AAP’s expanding vaccine schedule.”

**

“Safety testing, which typically requires months and years for other medical products, often lasts only a few days with vaccines – not nearly long enough to spot cancers or chronic conditions like autoimmune diseases (e.g. juvenile diabetes, rheumatoid arthritis, multiple sclerosis), allergic illnesses (e.g. food allergies, allergic rhinitis, eczema, asthma), or neurological and neurodevelopmental injuries (e.g. ADD, ADHD, narcolepsy, epilepsy, seizure disorders, and autism). Vaccine manufacturer’s vaccine inserts that accompany every vial of mandated vaccines include warnings about these and over 400 other injuries including many serious immune, neurological, and chronic illnesses for which FDA suspects that vaccines may be the cause.”

**

“The children who comprise this vaccine-injured generation are now aging out of schools that needed to build quiet rooms and autism wings, install wobble chairs, hire security guards and hike special ed spending to 25% to accommodate them.

They are landing on the social safety net which they threaten to sink. As Democratic lawmakers all around the nation vote to mandate more vaccines and call for the censorship of experts (including parents of vaccine-injured or killed children) that are expressing concerns about vaccine safety, Democratic Presidential candidates argue about how to fix America’s dysfunctional and unaffordable health care system without addressing the reality of the vaccine-related chronic disease and autoimmune disorder epidemic.

The good news for Big Pharma, of course, is that many of these vaccine-injured children have lifelong dependencies on unaffordable blockbuster drugs like insulin, Adderall, anti-psychotic drugs, Epi-Pens, asthma inhalers, and diabetes, arthritis, and anti-seizure meds made by the same companies that made the vaccines.”

**

“An overwhelming majority of the FDA officials directly charged with licensing vaccines, and the CDC officials who effectively mandate them for children, have personal financial entanglements with vaccine manufacturers. These ‘public servants’ are often shareholders in, grant recipients from, and/or paid consultants to vaccine manufacturers, and, occasionally, even patent holders of the very vaccines they vote to approve. Those conflicts of interest motivate them to recommend ever more vaccines with minimal support from evidence-based science”

**

“In 1986, Congress—awash in Pharma money (the pharmaceutical industry is number one for both political campaign contributions and lobbying spending on legislators over the past 20 years) enacted a law granting vaccine makers blanket immunity from liability for injuries caused by vaccines. The subsequent gold rush by pharmaceutical companies boosted the number of recommended inoculations from twelve shots of five vaccines in 1986 to 54 shots of 13 vaccines today. A billion-dollar sideline grew into the \$50 billion vaccine industry behemoth.”

**

“Since vaccines are liability-free – and effectively compulsory to a captive market of 76 million children – there is meager market incentive for companies to make them safe. The public must rely on the moral scruples of Merck, GlaxoSmithKline, Sanofi, and Pfizer. But these companies have a long history of operating recklessly and dishonestly, even with (the many drug) products for which they can be sued for injuries.

The four companies that make virtually all of the recommended vaccines are all convicted felons. Collectively they have paid over \$35 billion since 2009 for defrauding regulators, lying to and bribing government officials and physicians, falsifying science, and leaving a trail of (incurable chronic illnesses) injuries and deaths from products they knew to be dangerous and still sold under pretense of safety and efficacy.”

"I ate breakfast last week with the president of a network news division at CBS) and he told me that during non-election years, 70% of the advertising revenues for his news division come from pharmaceutical ads. And if you go on TV any night and watch the network news, you'll see they become just a vehicle for selling pharmaceuticals. He also told me that he would fire a host who brought onto his station a guest who lost him a pharmaceutical account."
