Pilot warns of airline industry disaster due to COVID-19 Vaccines

By [Sally Beck](#)

Captain Shane Murdock says the air industry is 'poised on the precipice of disaster'. A pilot for more than 40 years and a qualified air accident investigator, he has found official data that back up his claim of impending global catastrophe. He adds: 'When correlated, the data indicate there is an enormous problem that is having, and will have, a significant impact on aviation safety worldwide. There is enough evidence to be sending out red flags.'

There have been many tragedies this year. [Phil Thomas](#), a young graduate of the Cadiz, Spain, flight training academy, fell ill and died suddenly in April. There were five pilot incapacitations in March including a [British Airways](#) pilot who collapsed and died in Cairo, Egypt not long before he was due to fly.

Pilots are super-fit, so why are so many dying suddenly or collapsing? Cpt Murdock concludes they are suffering severe adverse reactions to the Covid-19 vaccinations, which has myocarditis (heart inflammation), brain fog, insomnia, blood clots and anaphylaxis as side effects.

He thinks some pilots are [ticking timebombs](#) and claims many are not declaring ill-health. He said: 'They are not reporting brain fog, heart flutters and dizzy spells because they don't want to lose their jobs.'

Aviators have comprehensive annual health checks, or six-monthly if they have been ill.

Rules state they can pass only with a less than 1 per cent chance of suffering an illness that could incapacitate them.

How are they passing medicals if they are suffering serious adverse reactions? Last year the global aviation regulator, the Federal Aviation Administration (FAA), changed the electrocardiogram (ECG) markers [that measure the 'PR interval'](#). This is the time it takes for an electrical impulse to travel from one part of heart to another and is an indicator of heart health. The new limit is 50 per cent longer than the previous limit, and means that if a pilot has developed a heart condition, it could slip past.

It was November 15, 2020, when Australian airlines mandated Covid-19 vaccines for 900 pilots, and all air and ground crew. Pfizer, AstraZeneca, and Moderna were available in Australia.

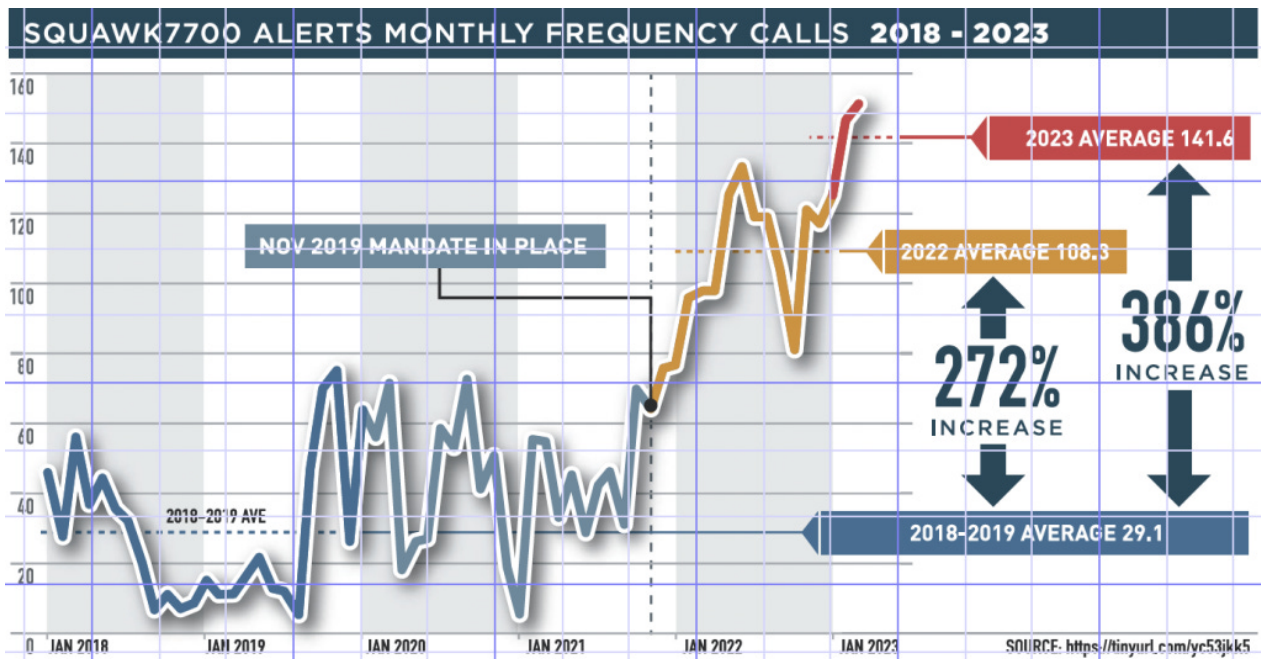

Today is the third anniversary of that mandate and Cpt Murdock is one of 12 pilots who refused. He was sacked of course, accused of serious professional misconduct, a charge generally reserved for inappropriate sexual behaviour or reckless and dangerous behaviour.

Mr Murdock, 60, who lives near Sydney, Australia, flew as Captain for Virgin Australia for 20 years, and has held a licence since 1984. He also has an MSc in Aviation Human Factors, the science behind how humans interface with machines. He said: 'Somewhere on the international network daily, you will find a plane has been turned back because of a health emergency. Either a passenger health emergency or crew health emergency.'

When pilots put out a mayday radio call to air traffic control, it is nicknamed a 'squawk'. They use the code 7700 for all mayday calls which are reserved for serious incidents like pilot incapacitation or an uncontained fire on board. Few scenarios warrant a mayday; passengers and crew must face genuine peril.

There has been an unprecedented rise in the numbers of mayday calls as tracked by a bot set up by the X account [@GCFlightAlerts](#). It posts when a pilot squawks 7700 anywhere in the world.

Between 2018, and 2019, the mayday average was 29.1 per cent of all distress calls. During 2022, mayday calls increased by 272 per cent. In the first three months of 2023, the increase was 386 per cent. The graph shows there was an instant, steep increase when the vaccines were mandated to pilots.

The average age of death in Australia during the pandemic was 85.3 years. The figures did not justify mandating vaccination to healthy, fit, pilots and implementing a no jab, no job policy. It even violated their own guidance: according to FAA rules, no pilot is allowed to take any type of medicine unless it has been approved and in use in the general population for 12 months. Pilots are forbidden to take part in drug trials and all Covid-19 vaccines were allowed under emergency use authorisation. The final phase of the trial finishes this year.

Cpt Murdock also looked at the number of multi-crew licenses issued by Australia's regulator, the Civil Aviation Safety Authority (CASA). They have the authority to impose restrictions on Airline Transport Pilot's Licenses (APTL). A multi-crew license restricts pilots to operating with multiple crew members and is issued when their medical status shows a possibility that they may become incapacitated whilst flying. CASA monitors and administers medical certification and licensing for all Australian pilots. Freedom of information data shows there has been an unprecedented increase of 126 per cent on limitations.

You would think this would prompt a major review by CASA, but they will do nothing while Australia's drug watchdog, the Therapeutic Goods Administration (TGA), still endorse Covid-19 vaccination for all. It is a revolving door avoiding responsibility that is familiar to those of us investigating vaccine issues.

Cpt Murdock thinks lack of action can have only one result, and bear in mind we have seen many planes make emergency landings because of pilot incapacitations. He is unequivocal and said: 'Disasters will occur and both aircrew and the traveling public will die unnecessarily.'

Comments by Dr. William Makis

I reported the pilot deaths and incapacitations that are mentioned in this article.

I have a very thorough record of pilot incapacitations and deaths inflight for 2023, that I have been tracking on my substack and once we have enough data, I will be releasing

comparisons of 2022 and 2023 pilot incapacitations, compared to the pre COVID-19 vaccine years.

Squawk codes are four-digit numbers used for communication between aircraft and air traffic control, allowing efficient communication during various situations related to safety and emergencies.

Squawk 7700 is an emergency code that indicates a serious issue onboard the aircraft. It may be due to technical, environmental or medical issues that results in an emergency situation.

It can be input by pilots or instructed by ATC, and it alerts controllers and ground crew to prepare for the arrival of the aircraft.

Other reserved squawk codes include 7500 for hijack situations and 7600 for lost communication with ATC. These codes provide easy notification to anyone monitoring the aircraft and allow ATC to provide the necessary assistance and priority services.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

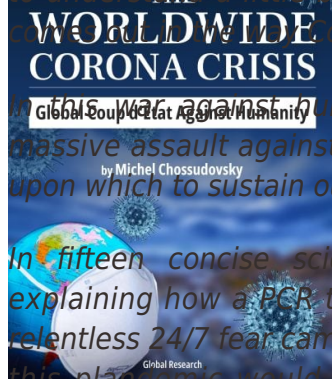

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in how the Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
