Why does Eric Clapton's story matter? He may have been injured by two doses of the AstraZeneca COVID-19 vaccine, but this is not just an "AstraZeneca issue".

This is a spike protein issue – regardless of the platform that delivers the spike protein into your body (Pfizer, Moderna, J&J, AstraZeneca, Novavax, Sputnik, Covishield).

Internationally renowned DJ, composer, songwriter Tyson Illingworth suffers Moderna

vaccine injuries ([click here](#)).

Tyson Illingworth: Vaccine damaged in Australia

Updated | 24 Oct 2022 The Daily Examiner

"In October that same year (2021) I received my first vaccination (Moderna). Within days I started to feel severe and unbearable shooting pain and paralysis in my hands and feet"

"Over time my condition worsened; I asked the doctors at the hospital if I would ever walk 'properly' again, and they would not give me an answer"

"Shortly after the second shot my injuries were further exacerbated and I was unable to move, my hands felt like they were on fire...I was rushed to hospital once again, and I thought my life was over"

"I continue to suffer severe ongoing pain due to Neuropathy and neurological nerve damage due to the Moderna Spike Vax....neuropathy was not listed on any of my consent forms"

"In Australia doctors are investigated and disciplined if they confirm in writing that a COVID vaccine has caused a patient injury. I had 5 different doctors confirm that my condition was caused by the vaccine, and they all said they cannot go on record."

NIH Study (Safavi et al): Neuropathic symptoms with SARS-CoV-2 vaccination

23 patients were studied with new neuropathic symptoms within 1 month post vaccination (12 Pfizer, 9 Moderna, 1 J&J, 1 AstraZeneca). 21 were women ([click here](#)).

"All participants reported moderate to severe, distal predominant paresthesias and/or burning sensations in both their upper and lower limbs; 9 also had involvement of the face, mouth, and scalp."

“52% (12/23) of patients had objective evidence of small-fiber peripheral neuropathy”

Conclusions: This observational study suggests that a variety of neuropathic symptoms may manifest after SARS-CoV-2 vaccinations and in some patients might be an immune-mediated process.

2023: Pfizer mRNA vaccine causes small fiber neuropathy with auto-antibodies ([click here](#)):

Small Fiber Neuropathy Triggered by COVID-19 Vaccination: Association with FGFR3 Autoantibodies and Improvement during Intravenous Immunoglobulin Treatment

Yet another case of immune system dysfunction and damage post Pfizer mRNA vaccination. This patient ended up with an autoimmune condition.

I am willing to bet that no one had these discussions as part of their “informed consent” before receiving COVID-19 vaccines and boosters.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
