All the Stanford doctors who looked at the case, which started a week after Moderna vaccination, are clueless as to the potential cause of this deadly disease. In this video, we hear the case history.

Executive summary

Prion diseases, which are always fatal, [have been associated in the scientific literature with the COVID vaccination](#).

For example, see [Studies Link Incurable Prion Disease With COVID-19 Vaccines](#) points out:

The French study identified 26 cases across Europe and the United States. Twenty of the individuals had already died by the time the study was written, with death occurring, on average, 4.76 months after being vaccinated. Among the 20 deaths, eight of the individuals experienced sudden death, in an average time period of 2 1/2 months after vaccination.

I've written about prion diseases before in [PROOF: COVID vaccines cause prion diseases](#) and, most recently, in this article: [Twitter made a huge mistake. I was right about prion diseases. They were wrong. Surprised?](#)

Professor Byram Bridle speculated in May 2021 that the COVID vaccines would cause prion diseases.

In [this video](#), I interview the husband and mother of Tammy Pottorff about what happened to Tammy after she got the shot. Within a week, the signs of prion disease were present.

To this day, the doctors at Stanford act completely clueless as to what might have caused Tammy's brain to fail.

All the doctors refuse to consider it could have been the vaccine despite [overwhelming evidence that these vaccines cause prion diseases](#).

It simply couldn't be the vaccine but they won't say how they can rule this out.

Richard Pottorff's wife came down with CJD, a fatal prion disease, a week after getting the shot

CJD is extremely rare... 1 case per million people per year. There are many reports of this happening shortly after COVID vaccination. Here's a case history in Sunnyvale, CA of this happening. It looks like it won't be written up in the medical literature since nobody wants to talk about it.

The doctors cannot figure out the cause or an effective treatment. It took 6 months for them to get an appointment because the neurologists are so overbooked due to a flood of neurological cases... they don't know why.

None of the 10 doctors who looked at this case think there is any possibility it is the vaccine despite [the medical literature showing dozens of such cases](#) immediately starting right after the patient took the COVID vaccine.

I wish I could interview these doctors on camera but you know what the chances of that happening are... zero.

In this [video interview](#), you'll hear from Tammy's husband and mother what they think about what happened to Tammy.

Because of what happened to Tammy, about 10% of Tammy's friends won't be getting any further shots. The other 90% are not deterred by the story and want to be protected (even

though there is no evidence that booster shots add protection).

The one doctor who is aware of what is going on and told the family not to take the vaccine is not speaking out publicly because he doesn't want to have his medical license taken away.

Since the doctors aren't going to write up this case history for the medical journal, the responsibility for surfacing these stories falls upon misinformation spreaders such as myself.

Poll

This poll should be shocking to everyone. Consider this:

So that means if the average person knows 1,000 people, we'd expect 1 person in 1000 to know someone with a current prion disease. As you can see, the rate is 100X what we'd expect. How will they explain that one?

Whole lotta CJD happening to vaccinated people

Here's a recent [tragic](#) story and [another](#). These stories are *celebrity* CJD deaths; non-celebrity deaths wouldn't generate a story. A celebrity dying of CJD was pretty much unheard of before the COVID vaccines rolled out. This suggests that the rate in the general public is huge.

Note that Mad Cow is not classic CJD. Here's the [CDC page on CJD](#).

So don't make that mistake. But other than that, this is a good post:

Tamiko Heidrich @Theidrich · 18h

Replying to @stkirsch

Prion disease is the same or similar to mad cow disease, correct? I've read about this a few months ago on Coffee and Covid substack article about one of the side affects of the Jab is prion disease (<https://www.coffeeandcovid.com/p/-coffee-and-c...> What's different from pre-mad cow disease is that mad cow disease takes years to kill people, as opposed to jab induced mad cow disease progress so much faster and kills people. Based on French study, symptom started within 11 days of being vaccinated, and 26 people involved in study all died.

Summary

We knew prion diseases were a risk factor from these vaccines since May 2021. When Professor Byram Bridle got the biodistribution data from Pfizer, he voiced his concern publicly at the time. I was on the call. He was right.

What happened to Tammy is tragic. What's worse is that the medical community is taking a blind eye to what has happened. Not only will they not acknowledge the cause or speak out publicly about what has happened, they won't even document these cases in the medical literature. So these deaths will keep happening and most people will be none the wiser. And "that's just the way it goes" as [Dr. Eric Rubin might have said](#).

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
