In a [live television appearance today on the BBC](#), cardiologist [Dr. Aseem Malhotra](#) took the network by surprise when he made the “unprompted” suggestion that mRNA vaccines, such as the Pfizer-BioNTech and Moderna COVID-19 vaccines, pose a cardiovascular risk.

Malhotra later tweeted the video from his BBC appearance, accompanied by the celebratory message, “We broke mainstream broadcast media,” generating instant controversy in the Twittersphere and elsewhere — ranging from triumphant tweets by those skeptical of mRNA vaccines, to calls for Malhotra to be “canceled” and questioning his claims.

BREAKING BBC News:

Cardiologist says likely contributory factor to excess cardiovascular deaths is covid mRNA vaccine and roll out should be suspended pending an inquiry.

We did it. We broke mainstream broadcast media 🇬🇧
pic.twitter.com/F72YS7JAuE

— Dr Aseem Malhotra (@DrAseemMalhotra) [January 13, 2023](#)

Malhotra’s father, Dr. Kailash Chand — a prominent general practitioner who was formerly deputy chair of the British Medical Association — died in July 2021.

In an October 2022 [interview with Robert F. Kennedy, Jr.](#), chairman and chief litigation counsel for [Children’s Health Defense](#) (CHD), Malhotra shared how he was one of the first to take the [Pfizer vaccine](#) and how he publicly [promoted the vaccines](#) on TV. But that was before he thoroughly reviewed the scientific safety data, which convinced him the vaccines pose unprecedented harm.

Malhotra told Kennedy he was prompted to look into the safety data on the [COVID-19](#) vaccine when his father — “a very eminent doctor in the U.K., considered one of the most prolific advocates for the National Health Service” — suffered an unexplained sudden cardiac death in July after getting an mRNA COVID-19 vaccine.

Malhotra has since publicly suggested that [mRNA vaccines were a contributing factor in his death](#).

According to his online biography, [Malhotra is a cardiologist](#) and Visiting Professor of Evidence-Based Medicine at the Bahiana School of Medicine and Public Health in Brazil. He is also an honorary council member of the Stanford University School of Medicine’s Metabolic Psychiatry Clinic and cardiology examiner at the U.K.’s University of Hertfordshire.

Malhotra: ‘mRNA vaccines carry a cardiovascular link’

Malhotra appeared on the BBC today to discuss a recent change in policy by the U.K.’s National Health Service (NHS) [that loosened restrictions on prescribing statins](#) — medications that reduce cholesterol in the blood — allowing general practitioners to prescribe them to anyone who wants them.

However, several minutes into his live appearance, in the context of a discussion of cardiovascular risk, he pivoted and addressed his views on mRNA vaccines. He said:

“What is almost certain — if I can just say this — my own research has found, and this is something that is probably a likely contributing factor, is that the COVID mRNA vaccines do carry a cardiovascular risk.

“And I’ve actually called for the suspension of this pending an inquiry, because there’s a lot of uncertainty at the moment over what’s causing the [excess deaths](#).”

Malhotra’s remarks caught the network — and presenter Lukwesa Burak — off guard. Visibly uncomfortable, Burak followed up by stating, “So what you’re saying in terms of the mRNA link to cardiovascular risk is that that’s been proven medically, scientifically?”

According to the U.K.’s Press Gazette, a BBC spokesperson later issued a response to the incident, stating:

“Dr Aseem Malhotra was invited on to the BBC News Channel to talk about the latest NICE [National Institute for Health and Care Excellence] recommendations on statins. During the discussion he made unprompted claims about the COVID mRNA vaccine.

“We then asked [Professor Peter Openshaw](#), who represents the overwhelming scientific consensus on the vaccine, to be interviewed on air on this topic and he challenged and rebutted the claims that had been made.”

Openshaw is a professor of experimental medicine at [Imperial College London](#), the same institution that developed “models” [predicting large numbers of infections and deaths](#) if severe COVID-19 countermeasures, such as lockdowns and social distancing, were not imposed.

Many people responded positively to Malhotra’s tweet and video.

[Emma Kenny](#), a British psychologist and television presenter, tweeted:

It's got to symbolise their resignation to being no longer able to hide this travesty and tragedy. Well done xx

— Emma Kenny (@emmakennytv) [January 13, 2023](#)

A [tweet](#) stated “WOW! Truthbombing on the BBC! Well done Sir.”

Another [tweet](#) read:

“Good job Aseem!! The interviewer was completely thrown and tried to challenge your statement regarding MRNA [vaccine] by suggesting your assertions unproven— but as soon as she realized she couldn't, she quickly changed the subject. Doubt you'll be invited back on the BBC anytime soon!”

Another [Twitter user](#) noticed that a copy of Kennedy's “[The Real Anthony Fauci](#): Bill Gates, Big Pharma, and the Global War on Democracy and Public Health,” was visible behind Malhotra:

And a prominent copy of Kennedy's "The Real Anthony Fauci" on your bookcase. . . Based!

— Paul Oakley (@PaulJamesOakley) [January 13, 2023](#)

[Another tweeted](#):

“Excellent. You came across very well and put the point about the vax link in a balanced and reasonable way.”

Some other Twitter users were less pleased. One user openly [asked Ofcom](#), Britain's telecommunications regulator, why the “disgraced, lying fraud” Malhotra was “allowed to do this” on the BBC.

[Deborah Elaine tweeted](#) a message about the BBC broadcast to Timothy Caulfield, a professor of law at the University of Alberta in Canada and host of a television program known as “A User's Guide for Cheating Death.”

Caulfield later followed this up with an [enraged tweet](#) asking:

“What the HELL is the @BBCNews doing giving a notorious & discredited anti-vaxxer THIS platform???

“NO evidence to support his claims. He published his ‘analysis’ in a vanity journal that he edits. Etc.

“Pls, get it together, @BBCBreaking @BBCHealth! So much damage with this BS!”

Some establishment media also criticized Malhotra. One Yahoo! News headline, for instance,

reads "[BBC Gives Unchallenged Platform to Anti-Vaxxer](#)."

The Press Gazette claimed "the overwhelming bulk of peer-reviewed literature suggests that mRNA vaccines are safe."

Notably, the article was written by Bron Maher, whose Press Gazette bio states he previously worked for [NewsGuard, a "fact-checking" firm](#) that closely collaborates with the WHO and social media platforms, as previously reported by The Defender.

Malhotra previously published a peer-reviewed article in the [Journal of Insulin Resistance](#), "Curing the pandemic of misinformation on COVID-19 mRNA vaccines through real evidence-based medicine."

In July 2021, when his father died, Malhotra tweeted:

I'm left without any doubt that the mRNA product was a likely contributory factor in the sudden cardiac death of my father, Dr Kailash Chand Malhotra (Honorary Vice President of the British Medical Association)
<https://t.co/XZRw7yh6EW>

— Dr Aseem Malhotra (@DrAseemMalhotra) [September 26, 2022](#)

Following an October 2022 [appearance on Fox News](#), Malhotra tweeted:

BREAKING:

How did my father die?

'It's very likely that the mRNA products cause rapid acceleration of coronary artery disease'

'The evidence is clear & overwhelming for complete suspension of these vaccines pending an inquiry'

Today I take this to parliament. Let's end this! pic.twitter.com/e3LaMAxjau

— Dr Aseem Malhotra (@DrAseemMalhotra) [October 20, 2022](#)

Malhotra said [delays in an ambulance being dispatched](#) by the U.K.'s beleaguered NHS to transport his father after suffering cardiac arrest also appears to have contributed to his death.

More and more studies demonstrating link between mRNA vaccines, cardiac problems

In a recent video, New Orleans-based emergency medicine physician [Dr. Joseph Fraiman](#) also called for the immediate suspension of the administration of mRNA vaccines.

Fraiman co-authored a peer-reviewed article, "Serious adverse events of special interest following mRNA COVID-19 vaccination in randomized trials in adults," published in August

2022 in [Vaccine](#).

In his video, Fraiman stated:

“I was the lead author of a peer-reviewed study that reanalyzed the original Pfizer and the Moderna clinical trials for the messenger RNA COVID-19 vaccines. We found the vaccine increased serious adverse events at a rate of one in 800.

“At the time of publication, my co-authors and I did not believe our single study warranted the withdrawal of the messenger RNA vaccines from the market. However, since its publication, multiple new pieces of evidence have come to light, and this has caused me to reevaluate my position.

“An [article published in The BMJ](#) regarding the FDA’s [U.S. Food and Drug Administration] own observational surveillance data found the messenger RNAs were associated with multiple of the exact same serious adverse events identified in our original study. But the FDA had failed to inform the public of these findings.

“In addition, now we have [multiple autopsy studies](#) that [find](#) essentially conclusive evidence that the vaccines are inducing sudden cardiac deaths. Yet the rate of these vaccine-induced deaths remains unknown.

“I believe, given the information, the messenger RNA vaccines need to be withdrawn from the market until new randomized controlled trials can clearly demonstrate the benefits of the vaccine outweigh the serious harm now we know the vaccines are causing.”

[Malhotra re-tweeted](#) Fraiman’s video, remarking “This is huge.”

Earlier this week, [Andrew Bridgen](#), a member of Parliament with the U.K.’s ruling Conservative Party, had his whip removed — meaning he was suspended by his party pending “formal investigation” — for [tweeting](#) that COVID-19 vaccines are “causing serious harms” and repeating a quote from a cardiologist [who told ZeroHedge](#) the COVID-19 vaccination campaign is “the biggest crime against humanity since the Holocaust.”

Numerous U.K. politicians, including Prime Minister Rishi Sunak, quickly condemned Bridgen’s remarks. Bridgen is known for being outspoken regarding his views on COVID-19 and the COVID-19 vaccines, including during [parliamentary speeches](#).

On Jan. 10, Kennedy, CHD and others [sued the BBC](#), the Associated Press, Reuters and The Washington Post, which are all members of the Trusted News Initiative (TNI), a partnership [spearheaded by the BBC](#).

The plaintiffs allege TNI members colluded with [Big Tech](#) to censor and de-platform voices questioning official COVID-19 and 2020 U.S. presidential election narratives.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
