In very early 2020 there was a lot of chatter about where the virus, later named SARS-CoV-2, actually came from. In an excellent, detailed [article](#) for the Bulletin of the Atomic Scientists, former NY Times science writer Nicholas Wade describes how two short pieces published in [The Lancet](#) and [Nature Medicine](#) in Feb-March 2020 determined how this chatter would be channeled.

These two extraordinarily influential pieces, each simply titled as a "Correspondence," were parroted by the mainstream media for a year. Each was plainly intended to shut down any discussion of a possible lab origin.

I happened to read both Correspondences in March 2020 and it was immediately apparent to me that each was designed as a propaganda tool. Neither had anything to do with science. In fact, the Andersen Correspondence butchered the science. Each had an unusual concatenation of authors.

I was so intrigued by these articles that I kept searching the net to understand them, and discovered that Francis Collins, the NIH Director, had blogged on March 26 about the *Nature Medicine* Correspondence, suggesting it should put an end to conspiracy theories about lab origin.

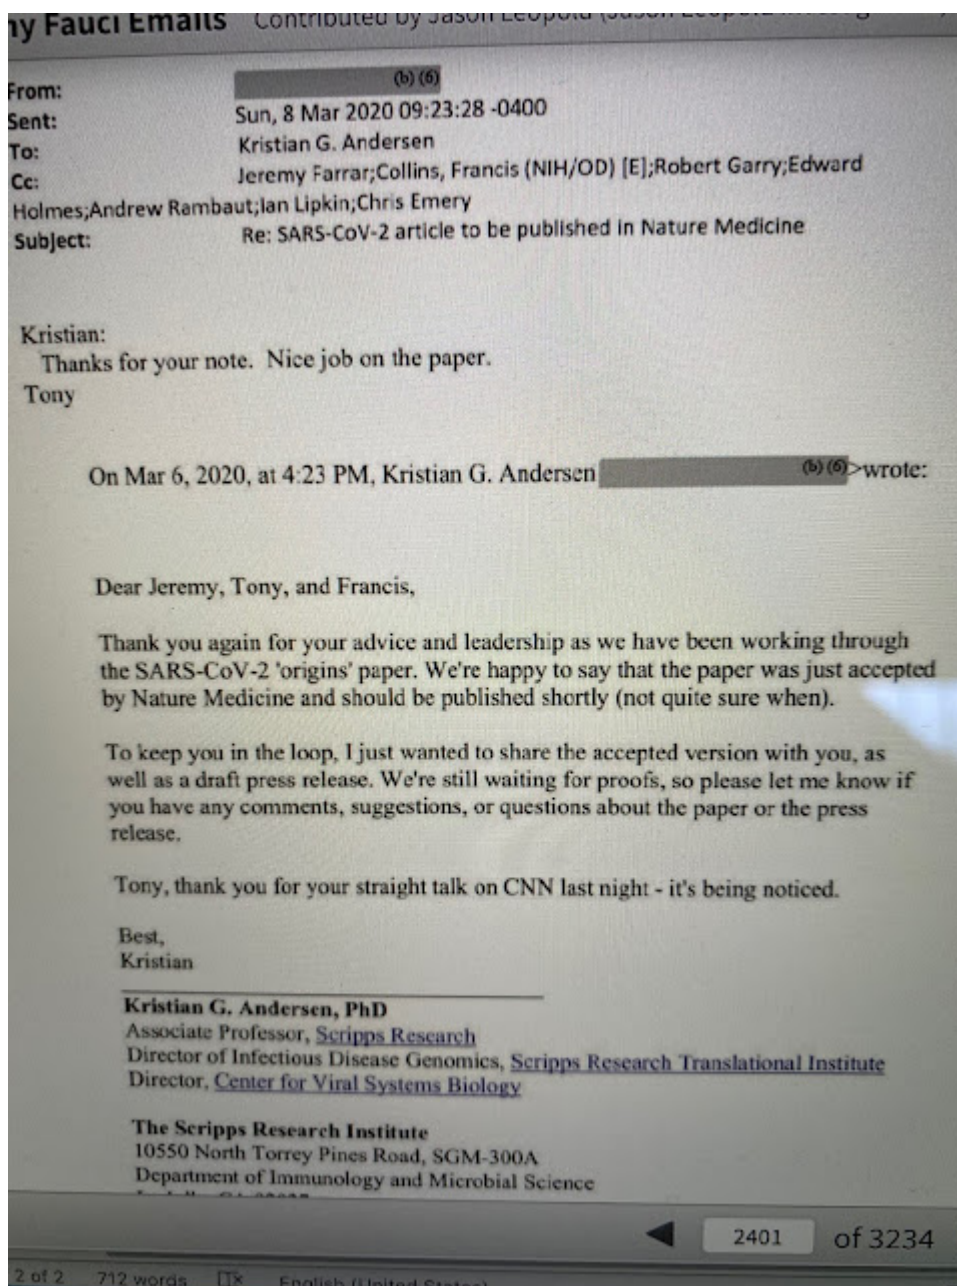

I further found the letter from the 3 heads of the US National Academy of Science, Engineering and Medicine, which had been referred to by the *Lancet* Correspondence authors. But it had not yet been published when the *Lancet* correspondence was written, suggesting again some hidden connection (or mutual effort) involving the author(s) of the National Academies letter and the *Lancet* Correspondence author(s).

I wondered why 5 otherwise credible scientists would sign their names to the *Nature Medicine* Correspondence, when the arguments made in the paper were nonsensical. I

concluded that they had been put up to it by a 'hidden hand,' and when I was interviewed for the film that became *Plandemic 2: Indoctrination* I said so. (The film has been banned and shadowbanned, as have many of my writings, so it is impossible to find using google or a standard search engine. [Here it is](#) on Bitchute, using the Ecosia search engine.)

Months ago, in another email drop obtained by US Right to Know, we learned that Peter Daszac, CEO of the nonprofit EcoHealth Alliance, was the primary but hidden author of the *Lancet* Correspondence. He was also the primary beneficiary, since his organization had been used as the pass through to send money from the NIAID to the Wuhan coronavirus lab. (Some might consider this method of giving out grants as a fancy way of money laundering.) Daszac, like Fauci, earned over \$400,000/year. He was also a member of the WHO Covid origins investigative team, and had been selected as the head of the *Lancet* Covid origins investigative team. But the *Lancet*-sponsored investigation looks like it is now dead in the water. The WHO and the *Lancet* thus seem to be co-conspirators, choosing the fox (Daszac) to guard the henhouse (the natural origin theory of Covid).

Today, I was sent a link to a specific one of Fauci's emails, and the mystery of why 5 well known scientists coauthored drivel, which the venerable *Nature Medicine* journal published, and which was then used as the foundation supporting the claim of Covid's natural origin, was solved. Here's the email.

The first author of the Nature Medicine paper thanks 3 incredibly important people for their “advice and leadership” regarding the paper. All 3 are MD researchers, and they dole out more money for medical research than anyone else in the world, perhaps excepting Bill Gates. Fauci runs the NIAID; Collins is the NIH Director (nominally Fauci’s boss) and Sir Jeremy Farrar is the director of the Wellcome Trust. Jeremy also signed the *Lancet* letter.

And he is the [Chair of the World Health Organization R&D Blueprint Scientific Advisory Group](#), which put him in the driver’s seat of the WHO’s Solidarity trial, in which 1000 unwitting subjects were overdosed with hydroxychloroquine in order to sink the use of the drug for Covid. Jeremy had worked in Vietnam, where there was lots of malaria, and [he had also been involved with SARS-1](#) there. He additionally was central in setting up the UK Recovery trial, where 1600 subjects were overdosed with hydroxychloroquine. I think he had some idea of the proper dose of the chloroquine drugs from his experience in Vietnam. But even if he didn’t, Farrar, Fauci and Collins would have learned about such overdoses after Brazil told the world about how they mistakenly overdosed patients in a trial of chloroquine for Covid, published in the JAMA in mid April 2020. Thirty-nine percent of the subjects in Brazil who were given high doses of chloroquine died, average age 50.

Yet the Solidarity and Recovery hydroxychloroquine trials continued into June, stopping only after their extreme doses were exposed.

Fauci made sure to control the treatment guidelines for Covid that came out of the NIAID, advising against both chloroquine drugs and ivermectin. Fauci's NIAID also cancelled the first large-scale trial of hydroxychloroquine treatment in early disease, after only 20 of the expected 2,000 subjects were enrolled.

What does all this mean?

1. There was a conspiracy between the five authors of the *Nature Medicine* paper and the heads of the NIH, NIAID and Wellcome Trust to cover up the lab origin of Covid.
2. There was a conspiracy involving Peter Daszac, Tony Fauci and others to push the natural origin theory.

(See other emails in the recent drop.)

3. There was a conspiracy involving Daszac to write the *Lancet* letter and hide its provenance, to push the natural origin theory and paint any other ideas as conspiracy theory. Collin's blog post is another piece of this story.
4. Farrar was intimately involved in both large HCQ overdose trials (in which about 500 subjects total died).
5. Farrar, Fauci and Collins withheld research funds that could have supported quality trials of the use of chloroquines and ivermectin and other repurposed drugs that might have turned around the pandemic.
6. Are the 4 individuals named here intimately involved in the creation of the pandemic, as well as the prolongation and improper treatments used during the pandemic?

Below are my two early posts on this subject from March and April 2020, and a snippet from the *Lancet Correspondence*, with a list of signatories.

I don't want to take credit improperly. Dan Sirotkin noticed the *Nature Medicine* article before I did, and wrote lucidly about it. I did not see his writing until much later.
