For the last three years, Robert F. Kennedy, Jr. has been one of America's strongest voices in defending our Constitutional Republic from public health officials and politicians wielding emergency power. In a series of rousing speeches reminiscent of his father's famous University of Capetown address in 1966, RFK, Jr. has articulated why we should never allow our constitution to be compromised by fallible men who promise to keep us safe. Today, April 5, 2023, he filed with the Federal Election Commission to run for President of the United States in the 2024 election.

Mr. Kennedy was an environmental activist thirty years before it became fashionable. For decades, he worked as an attorney to protect the natural world from corporate industrial polluters. He has been especially troubled by the contamination of our waterways such as the Hudson River with hazardous waste, including mercury. In 2005 he became concerned about a mercury compound used as a preservative in childhood vaccines, which prompted him to conduct a thorough investigation of vaccine safety in general. He found it especially alarming that the 1986 National Childhood Vaccine Injury Act granted vaccine manufacturers immunity from all civil and criminal liability for injuries or deaths caused by their products.

In the absence of legal liability, he realized that the only thing likely to regulate their conduct is scrutiny from a public figure, and because no other public figures were stepping up to do it, he himself assumed the responsibility. *No good deed goes unpunished*, as the saying goes. Mr. Kennedy's critical scrutiny of vaccine makers (coining billions while bearing zero product liability) has not been met with debate, but with vitriolic, ad hominem attacks and accusations of being a conspiracy theorist. Implied in these attacks is that no one should dare even question the safety of vaccines.

In 2021, he published his book, [The Real Anthony Fauci](#), meticulously cataloguing the

corruption, cronyism, and abuse of power rampant in the Bio-Pharmaceutical Complex in which Dr. Fauci has played a key role. Every statement in Mr. Kennedy's book is documented with a citation of primary sources including federal agency documents, peer reviewed medical literature, and public records. Any reader can easily evaluate these sources. The Kindle edition features hyperlinks to the documents.

The sixty-nine year-old Kennedy was educated at Harvard College and the London School of Economics, graduating from Harvard in 1976 with a Bachelor of Arts in American History and Literature. He went on to earn a Juris Doctor from the University of Virginia and a Master of Laws from Pace University.

It seems to me that even Republicans and dedicated Donald Trump supporters should welcome this momentous event. Mr. Kennedy has repeatedly demonstrated his dedication to preserving the U.S. Constitution and the American way of life it sustains. More so than any public figure with presidential ambitions, he has fought to protect individual American citizens from federal mandates and other acts of state overreach. He may be the only Madisonian classical liberal left who has an affiliation with the Democratic Party. Against the Republican contender in 2024, Mr. Kennedy would be an honorable and worthy opponent.

Readers of this Substack are encouraged to register on his [TEAM KENNEDY website](#), which will soon announce the details of his campaign kickoff ceremony in Boston on April 19.
