

Seeds of Destruction, Globalization of Poverty, Globalization of War: Three Important Books From Global Research Publishers

By [Global Research News](#)

Global Research, December 03, 2020

Theme: [Biotechnology and GMO](#), [Economy](#), [Poverty & Social Inequality](#), [US NATO War Agenda](#)

Global Research brings you a selection of three books that help give some context to the current state of the world and the power dynamics that got us here. Unfortunately, these books remain rather relevant, if not more so than at their time of publication...

[The Globalization of Poverty and the New World Order](#)

By Michel Chossudovsky

Year: 2003

376 pages

ISBN: 9780973714708

List Price: \$27.95 / [Special Price: \\$19.00](#)

In this expanded edition of Chossudovsky's international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalization of poverty.

This book is a skillful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically.

In this new enlarged edition - which includes ten new chapters and a new introduction — the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic

meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalisation.

[The Globalization of War: America's "Long War" against Humanity](#)

By Michel Chossudovsky

Year: 2015

240 pages

ISBN: 9780973714760

List Price: \$24.95 / [Special Price: \\$15.00](#)

America's hegemonic project in the post 9/11 era is the "Globalization of War" whereby the U.S.-NATO military machine —coupled with covert intelligence operations, economic sanctions and the thrust of "regime change"— is deployed in all major regions of the world. The threat of pre-emptive nuclear war is also used to black-mail countries into submission.

This "Long War against Humanity" is carried out at the height of the most serious economic crisis in modern history.

It is intimately related to a process of global financial restructuring, which has resulted in the collapse of national economies and the impoverishment of large sectors of the World population.

The ultimate objective is World conquest under the cloak of "human rights" and "Western democracy".

[Seeds of Destruction: Hidden Agenda of Genetic Manipulation](#)

By F. William Engdahl

Year: 2007

341 pages

ISBN: 978093714722

List Price: \$25.95 / [Special Price: \\$18.00](#)

This skilfully researched book focuses on how a small socio-political American elite seeks to establish control over the very basis of human survival: the provision of our daily bread. "Control the food and you control the people."

This is no ordinary book about the perils of GMO. Engdahl takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms.

The author cogently reveals a diabolical world of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain worldwide control over food production. If the book often reads as a crime story, that should come as no surprise. For that is what it is.

Engdahl's carefully argued critique goes far beyond the familiar controversies surrounding the practice of genetic modification as a scientific technique. The book is an eye-opener, a must-read for all those committed to the causes of social justice and world peace.
