### [How the USA and Turkey Plunder and Loot Syria with Impunity](#)

By [Rick Sterling](#), September 15, 2020

In October 2019 Turkish forces invaded Syria and now occupy a strip of land in north east Syria. The area is controlled by the Turkish military and pro Turkish militia forces misnamed the “Syrian National Army”. Turkish President Erdogan dubbed the invasion “Peace Spring” and said the goal was to create a “safe zone”. The [reality](#) was that 200 thousand Syrians fled the invasion and over 100 thousand have been permanently displaced from their homes, farms, workplaces and livelihoods.

### [Germany, France and the EU Succumb to US Digital Hegemony](#)

By [Dr. Thorsten Pattberg](#), September 15, 2020

It is official. President of France, Emmanuel Macron, on Monday 14, 2020, conceded that Europe has lost the battle for data security and cloud computing. The continent cannot

compete against America. Not that France could have asserted any claims to power; the fate of Europe was decided in Germany.

### [2020 Elections: Democrats Go All-Out for Israel](#)

By [Philip Giraldi](#), September 15, 2020

Those of us who have longed for an end to America's military engagement in the Middle East have hoped for a candidate who was not tied hand and foot to Israel, which is the root cause of the badly-broken and essentially pointless U.S. foreign policy in the region. But the real tragedy is that in spite of Israel's near-constant interference in government process at all levels in the United States, no candidate will mention it except in the most laudatory fashion. It will be praised as America's best friend and closest ally, but the price the U.S. has paid for all that balderdash while it has simultaneously been turning itself into the slave of the Jewish state will never surface.

### [Public Debt Is the Real Pandemic: \\$3.3 Trillion Federal Deficit, Largest in US History ....](#)

By [Rep. Ron Paul](#), September 15, 2020

According to the Congressional Budget Office's (CBO) latest "Update on the Budget Outlook," this year's \$3.3 trillion federal deficit is not just three times larger than last year: it is the largest federal deficit in history. The CBO update also predicts that the federal debt will equal 104 percent of the gross domestic product (GDP) next year and will reach 108 percent of GDP by 2030.

### [Dark Web Voter Database Report Casts New Doubts on Russian Election Hack Narrative](#)

By [Gareth Porter](#), September 15, 2020

Democratic politicians and corporate media pundits have long accepted it as fact that Russian intelligence "targeted" US state election-related websites in 2016. But the Kommersant report shows that those state registered voter databases were already available to anyone in the public domain, eliminating any official Russian motive for hacking state websites.

### [US Planned Nuclear Attacks on Every City in the USSR and China](#)

By [Shane Quinn](#), September 15, 2020

In mid-December 1960, a conference was held at Strategic Air Command headquarters near Omaha, Nebraska, to outline America's nuclear war strategy. During the meeting, plans were revealed whereby Moscow alone would be hit by 40 megatons of nuclear weapons. That is: about 4,000 times the force of the atomic bomb that leveled Hiroshima, on 6 August 1945.

## [Adverse Health Effects of Electromagnetic Field Exposure: To Bee, or Not to Bee, that Is the Five "G" Question](#)

By [Olle Johansson](#), September 14, 2020

The collective evidence we can draw from the current scientific status regarding adverse health and biological effects of artificial electromagnetic field exposures, such as from cell phones, antennas/base stations, TV and radio towers, babyalarms, smart meters, powerlines, and WiFi routers, points to that we may be jeopardizing more than our own health and behaviour. Bacteria, plants, birds, frogs, and pollinating insects, may all be targeted, and it is obvious we must proceed with the highest caution before immersing the citizens and our wildlife in more and more artificial electromagnetic fields. We may, as a matter of fact, already be gravely endangering our current as well as coming generations. To not act today, may prove a disaster tomorrow, and such lack of action may again result in the classical "late lessons from early warnings", or – even worse – "too late lessons from early warnings".
