Breaking the “big lie”, which upholds war as a humanitarian undertaking, means breaking a criminal project of global destruction, in which the quest for profit is the overriding force. This profit-driven military agenda destroys human values and transforms people into “unconscious zombies.”

Air strikes in Iraq and Syria have: “ ... destroyed 6,000 buildings with over 40,000 bombs and missiles have inevitably killed much higher numbers of civilians.” Apocalyptic horror. Of course US and UK presence in air and on the ground in Syria are entirely illegal.

The EU Commission (EC) has announced that it is planning to extend authorisation for glyphosate for a further ten years. The decision is based on the latest evaluation published by the European Chemicals Agency (ECHA) declaring glyphosate to be safe. The EC has actually approved 14 new import authorisations for genetically engineered plants resistant to herbicides. All these plants will contain residues from spraying. Several of the genetically engineered plants recently approved for import are not only resistant to glyphosate but also to combined applications of other dangerous herbicides, such as 2,4-D, dicamba, glufosinate and isoxaflutole.

[Is Bitcoin Standing In for Gold?](#)

By [Dr. Paul Craig Roberts](#) and [Dave Kranzler](#), May 31, 2017

Recently, the price of a Bitcoin has skyrocketed, rising in a few weeks from \$1,000 to \$2,200. Two explanations suggest themselves. One is that the Federal Reserve has decided to rid itself of a competing currency and is driving up the price with purchases while accumulating a large position, which then will be suddenly dumped in order to crash the market and scare away potential users from Bitcoins. Remember, the Fed can create all the money it wishes and, thereby, doesn't have to worry about losses.
