

Selected Articles: Media Sabotage of Hydroxychloroquine, Censorship of Medical Doctors

By [Global Research News](#)

Global Research, July 29, 2020

We hope that by publishing diverse view points, submitted by journalists and experts dotted all over the world, the website can serve as a reminder that no matter what narrative we are presented with, things are rarely as cut and dry as they seem.

If Global Research has been a resource which has offered you some solace over the past few months, we ask you to make a financial contribution to our running costs so that we may keep this important project alive and well! We thank you for your support!

[Facebook, Google/YouTube, Twitter Censor Viral Video of Doctors' Coronavirus Press Conference](#)

By [Allum Bokhari](#), July 29, 2020

The event, [hosted](#) by the organization America's Frontline Doctors, a group founded by Dr. Simone Gold, a board-certified physician and attorney, and made up of medical doctors, came together to address what the group calls a "massive disinformation campaign" about the coronavirus. Norman also spoke at the event.

"If Americans continue to let so-called experts and media personalities make their decisions, the great American experiment of a Constitutional Republic with Representative Democracy, will cease," [reads](#) the event's information page.

[American Physicians and Surgeons \(AAPS\) Sues the FDA to End Its Arbitrary Restrictions on](#)

[Hydroxychloroquine](#)

By [Association of American Physicians and Surgeon](#), July 29, 2020

Two million doses of HCQ [are being sent by the Trump Administration to Brazil](#) to help medical workers there safeguard themselves against the spread of the virus. But at the same time the FDA continues to block Americans' access to this medication.

[HCQ has been approved as safe by the FDA for 65 years](#), and the CDC states on its website that "CDC has no limits on the use of hydroxychloroquine for the prevention of malaria."

[LancetGate: "Scientific Corona Lies" and Big Pharma Corruption. Hydroxychloroquine versus Gilead's Remdesivir](#)

By [Prof Michel Chossudovsky](#), July 28, 2020

There is an ongoing battle to suppress Hydroxychloroquine (HCQ), a cheap and effective drug for the treatment of Covid-19. The campaign against HCQ is carried out through slanderous political statements, media smears, not to mention an authoritative peer reviewed "evaluation" published on May 22nd by The Lancet, which was based on fake figures and test trials.

The study was allegedly based on data analysis of 96,032 patients hospitalized with COVID-19 between Dec 20, 2019, and April 14, 2020 from 671 hospitals Worldwide. The database had been fabricated. The objective was to kill the Hydroxychloroquine (HCQ) cure on behalf of Big Pharma.

[VIDEO: Covid-19 and "The Spiderweb of Fear". American Medical Doctors and Health Experts are being Silenced...](#)

By [Prof Michel Chossudovsky](#), July 28, 2020

Dr. Anthony Fauci, advisor to Donald Trump, portrayed as "America's top infectious disease expert" [has played a key role in smearing the HCQ](#) cure which had been approved years earlier by the CDC. Dr. Fauci has been the head of the National Institute of Allergy and Infectious Diseases (NIAID) since the Reagan administration. He is known to act as a mouthpiece for Big Pharma.

In late June, Dr. Fauci launched Remdesivir a "corona wonder drug" developed by Gilead Sciences Inc. It's a \$1.6 billion dollar bonanza. It is \$3200 treatment per patient. HCQ has been banned by Fauci. Medical doctors are threatened of losing their licenses if they prescribe HCQ.

[The Media Sabotage of Hydroxychloroquine Use for COVID-19: Doctors Worldwide Protest the Disaster](#)

By [Elizabeth Woodworth](#), June 30, 2020

Is the media interested in a cure for Covid-19? Or is it in lockstep with Big Pharma, which seems to have little interest in an existing treatment for the disease?

What better strategy than for these financial interests to manufacture a hydroxychloroquine controversy?

A June 17 article titled “Behind the French controversy over the medical treatment of Covid-19: The role of the drug industry,” reveals just how such a tactic has been brought to bear on the issue.

[The Campaign Against Hydroxychloroquine \(HCQ\) Sustained by Corrupt Medical Professionals with Ties to Big Pharma](#)

By [Dr. Paul Craig Roberts](#), May 28, 2020

A few years ago the British medical journal, The Lancet, published a paper touting the safety of HCQ. But this was before HCQ with zinc was found effective if used earlier enough against Covid-19. Covid-19 turned HCQ’s effectiveness into a big problem for Big Pharma’s big profits.

The solution was another study by medical professionals some of whom have ties to Big Pharma and none of whom, apparently, are involved in the treatment of Covid patients. The study lumps together people in different stages of the disease and undergoing different treatments. It touts its large sample, but many of the patients in the sample received treatment too late after the virus had reached their heart and other vital organs. Most likely the people who died from heart failure died as a result of the virus, not from HCQ.

[Cover Up: Fauci Approved Chloroquine, Hydroxychloroquine 15 Years Ago to Cure Coronaviruses; “Nobody Needed to Die”](#)

By [True Pundit](#), May 21, 2020

Dr. Anthony Fauci, whose “expert” advice to President Trump has resulted in the complete shutdown of the greatest economic engine in world history, has known since 2005 that chloroquine is an effective inhibitor of coronaviruses.

How did he know this? Because of research done by the National Institutes of Health, of which he is the director. In connection with the SARS outbreak – caused by a coronavirus dubbed SARS- CoV – the NIH researched chloroquine and concluded that it was effective at stopping the SARS coronavirus in its tracks. The COVID-19 bug is likewise a coronavirus, labeled SARS-CoV-2. While not exactly the same virus as SARS-CoV-1, it is genetically

related to it, and shares 79% of its genome, as the name SARS-CoV-2 implies. They both use the same host cell receptor, which is what viruses use to gain entry to the cell and infect the victim.
