[US Officials Speak at Iran Regime Change Conference](#)

By [Dave DeCamp](#), July 20, 2020

An exiled Iranian opposition group [held its annual Free Iran conference](#) online on Friday featuring speeches from an array of former US politicians and military officials. The conference was held by the National Council of Resistance of Iran, a coalition led by the People's Mujahedin of Iran, or MEK (Mujahedin-e Khalq), a controversial group widely considered to be a cult, and up until 2012, designated as a terrorist organization by the US government.

[Electromagnetic Radiation: What Is the Real 5G Agenda and Why the Frantic Hurry to Deploy It?](#)

By [Claire Edwards](#) and [Tim Lynch](#), July 20, 2020

So she decided to take her radiation meter for measuring electromagnetic fields – and do some ‘readings’ in this whole area. She visited the conference areas, where they had these ‘public access’ areas that were for mobile phones – cell phone access and also for wifi access. In these conference areas they tend to have very high ceilings – and she found that the radiation was not that bad, but in the corridors where most of the staff worked – as these were very narrow corridors – with metal walls and very low ceilings above all these public access points – her meter would not even measure the exposure levels there, as it was off the scale!

[Turkey Will be the Death of NATO: Its Recent Clash with Fellow Member France Off the Coast of Libya Is an Early Symptom](#)

By [Scott Ritter](#), July 20, 2020

The election of Recep Tayyip Erdogan, a follower of the ousted Erbakan, as Turkey's prime minister in 2003 set Turkey on a collision course with NATO and the West. Erdogan is an

unapologetic Islamist whose pan-Ottoman vision of Turkey's role in the world clashes with the traditional transatlantic script followed by NATO.

[Making America Feared Again: The Trump Administration Considers Resuming Nuclear Weapons Testing](#)

By [Lawrence Wittner](#), July 20, 2020

The [U.S. government](#) stopped its atmospheric testing of nuclear weapons in 1962, shortly before signing the Partial Test Ban Treaty of 1963. And it halted its underground nuclear tests in 1992, signing the Comprehensive Test Ban Treaty (CTBT) in 1996. Overall, it conducted 1,030 nuclear weapons test explosions, slightly more than half the global total.

[Nicaragua: No Stopping the Sandinista Revolution](#)

By [Stephen Sefton](#), July 20, 2020

41 years on from the revolutionary triumph of 1979, the Sandinista Front for National Liberation (FSLN) in Nicaragua looks stronger and with greater legitimacy than ever. Nicaragua embodies the same revolutionary paradox as Cuba and Venezuela. Despite all three countries being attacked via illegal unilateral coercive measures imposed by the US government, followed by its European allies, all three revolutionary governments have defended their peoples against the current pandemic with much greater success than neighboring countries.

[China Inks Military Deal with Iran Under Secretive 25-Year Plan](#)

By [Simon Watkins](#), July 20, 2020

One of the secret elements of the deal signed last year is that China will invest US\$280 billion in developing Iran's oil, gas, and petrochemicals sectors. This amount will be [front-loaded](#) into the first five-year period of the new 25-year deal, and the understanding is that further amounts will be available in each subsequent five year period, provided that both parties agree. There will be another US\$120 billion of investment, which again can be front-loaded into the first five-year period, for upgrading Iran's transport and manufacturing infrastructure, and again subject to increase in each subsequent period should both parties agree. In exchange for this, to begin with, Chinese companies will be given the first option to bid on any new – or stalled or uncompleted – oil, gas, and petrochemicals [projects](#) in Iran.
