[Trump's One Trillion Dollar Infrastructure Boondoggle. Handing Over Public Assets to Private Corporations](#)

By [Mike Whitney](#), March 16 2017

Donald Trump's \$1 trillion infrastructure plan is not an infrastructure plan and it won't put \$1 trillion of fiscal stimulus into the economy. It's basically a scheme for handing over public assets to private corporations that will extract maximum profits via user fees and tolls. Because the plan is essentially a boondoggle, it will not lift the economy out of the doldrums, increase activity or boost growth. Quite the contrary.

[The Impacts of Vaccines: Aluminum, Autoimmunity, Autism and Alzheimer's](#)

By [Dr. Gary G. Kohls](#), March 16 2017

It is important to note that the reason that aluminum has been used in vaccines for the last 80+ years is because it has been found to be an "adjuvant" (defined as "a substance that enhances the body's immune response to an antigen." An "antigen" is "a toxin or other foreign substance that induces an immune response in the body". Interestingly, nobody really understands exactly how aluminum performs as an adjuvant, and there is a desperate search for other adjuvants because the vaccine industry understands just how toxic it is.

[Kagame's Economic Mirage in Rwanda](#)

By [Ann Garrison](#) and [David Himbara](#), March 16 2017

Kagame claims to have inspired Rwandans to rise from the ashes to build an economic miracle and example for all Africa, and no one reinforces these claims more than Bill Clinton and Tony Blair. In a new book, however, economist David Himbara says that Kagame's economic miracle is in fact an economic mirage. I spoke to David Himbara.

[Corporate Media Exposed For Reporting Syria Misinformation. Canadian Journalist Eva Bartlett](#)

By [Brandon Turbeville](#), March 16 2017

Despite the smear campaign, none of the corporate NGO attackers ever address a single claim she makes. Instead, they go right to accusations, over-talking, and name-calling. If her statements were so bogus, they would be easy to refute, right? Still, there is no debate, only catcalls. The reason for this approach is simply because each time one of the mainstream media drones or an NGO fanatic engages her in an actual debate, they end up getting their asses handed to them on internationally broadcast programs.

[International Banks Targeted for Prosecution in South Africa](#)

By [Abayomi Azikiwe](#), March 16 2017

Republic of South Africa President Jacob Zuma has leveled sharp attacks on the financial industry inside the country accusing banks of treating the population unfairly.

[Stop Protecting the Criminality of the Global Pesticides Industry](#)

By [Colin Todhunter](#), March 16 2017

Since the end of the Second World War, we have had to endure our fields and food being poisoned in the manner Rachel Carson highlighted decades ago. These companies sell health-and environment-damaging products, co-opt scientists, control public institutions and ensure farmers are kept on a chemical treadmill. From CEOs and scientists to public officials and media/PR spin doctors, specific individuals can be identified and at some stage should be hauled into court for what amounts to 'crimes against humanity'.
