

Seven-year-old Florida Girl Was Given Two Pfizer COVID-19 mRNA Jabs. Now Has Systemic Lupus Erythematosus (SLE) and Is on Daily Steroids, HCQ

16 children get LUPUS after Pfizer!

Central Florida – Real Estate Agent Jennifer Rios Rivera had her 7 year old daughter vaccinated with Pfizer COVID-19 mRNA Vaccine in Dec. 2021 because she was asthmatic.

Her daughter developed side effects 10 days after the 2nd Pfizer mRNA jab (chest pain, joint pain, leg weakness) but couldn't get a diagnosis for 2 years. She was finally diagnosed with Lupus and Rheumatoid Arthritis and is now on steroids, plaquenil, celebrex and still has symptoms ([source](#)).

Jennifer Rios Rivera

November 19 at 10:26 AM · 🌐

I want to tell my daughter story someday when I feel prepared but long story-short, I vaccinated my daughter with Pfizer on Dec 2021 when she was 7 yrs just because she was asthmatic and got really ill with the flu in the past so I decided to vaccinate her to avoid a Pneumonia like she had because of the FLU and since a lot of people died because of Covid-19 I was so freaked out that something like that could happened to her.

10 days after the 2nd Pfizer shot she started with chest pain, severe joint pain, nausea all the time, dizziness, she said she felt like a ball on her throat, leg weakness, numbness in her legs, persistant cough, she even woke up at nights crying due to pain, she had purple spots in her body, a rash after sun exposure, extreme fatigue, months later they told me she was anemic, she had blood in urine, lots of symptoms and abnormal labs at the same time, so her Pediatrician ordered a test named ANA test which basically tells if there is an autoimmune disorder, even though the test positive by itself doesn't mean that you have an autoimmune disorder because it could be positive even in the healthy population. It was the first time I heard about autoimmune disorder... after that she was seen different specialties, pulmonologist, cardiologist, nephrologist, genetics, ENT, rheumatology, neurologist, hematologist, GI dr, even a phsychiatric doctor, no one could even pinpoint and connect the dots. So I decided to get a second opinion with another rheumatologist and hematologist and after 2 years the new rheumatologist ordered more test and he diagnosed my 9 old daughter w Systemic Lupus Erythematosus and Rheumatoid Arthritis. She is on infusion treatment right now, daily medications like steroids, plaquenil and celebrex and still she have some of those symptoms.

I'm not an anti-Vax person just to be clear! But this is what happened to us.

Someday she will tell her story, she is a very brave girl, not afraid of needles thank God, embracing this illnesses like a champ. Doctors are going to even do literature with her case and do more research because as of today HOSPITALS usually don't know how to deal at the ER with autoimmune disorders FLARES when they get really bad.

Maybe she was going to develop those illnesses at some point in her life... maybe not...who will ever know.

- [2022 Sep \(Sagy et al\)](#) - New-onset systemic lupus erythematosus following BNT162b2 mRNA COVID-19 vaccine: a case series and literature review
- [2022 May \(Watanabe et al\)](#) - Case Report: New-Onset Rheumatoid Arthritis Following COVID-19 Vaccination

[2022 Sep \(Sagy et al\)](#) - New-onset systemic lupus erythematosus following BNT162b2 mRNA COVID-19 vaccine: a case series and literature review

- Case 1: 24M had 1st Pfizer mRNA
 - 3 days later, a rash appeared on the head neck and arms, and stiffness in both wrists
- Case 2: 23M had 2nd Pfizer mRNA
 - 1 month later he developed fever and pancytopenia, oral ulcers and malar rash over his face.
- Case 3: 56M had 2nd Pfizer mRNA
 - 1 month later he was admitted to hospital for left hand joint pain and swollen left axillary lymph nodes.
 - Exam showed bilateral knee and left wrist arthritis.
- All three were diagnosed with Lupus
- Literature reviewed showed 3 other cases after mRNA vaccination:
 - 27F, Moderna 2nd dose, 2 weeks later arthritis
 - 22F, Pfizer 1st dose, 1 week later cutaneous vasculitis, pancytopenia
 - 24M, Pfizer 2nd dose, 2 weeks later fever, arthritis, oral ulcers, etc.
- Post mRNA Vaccine Lupus: very variable clinical picture
- Other than SLE, the diagnosis of new-onset autoimmune conditions following COVID-19 vaccination has been reported previously:
 - rheumatoid arthritis
 - immune thrombotic thrombocytopenia
 - autoimmune liver diseases
 - Guillain-Barré syndrome
 - IgA nephropathy
- Two theories on mechanism:
 - 1. molecular mimicry of spike protein to human proteins
 - 2. Immune activation that produces Type 1 Interferon

[2022 May \(Watanabe et al\)](#) – Case Report: New-Onset Rheumatoid Arthritis Following COVID-19 Vaccination

- 53F year old Japanese man had 2 Pfizer mRNA jabs
- 4 weeks after 2nd dose his left knee joint became swollen and painful.
- Blood labs showed elevated Rheumatoid factor, but also elevated cytokines IL-6, TNF- α and IFN- γ .
- Diagnosis: Rheumatoid Arthritis caused by Pfizer vaccine
- Conclusion: “Given that pro-inflammatory cytokine responses play crucial roles in the development of autoimmune disorders, it is likely that COVID-19 vaccination can be a trigger for production of pro-inflammatory cytokines”
- “Here we show a case of *de novo* RA following COVID-19 vaccination and characterized by systemic pro-inflammatory cytokine responses including IFN- γ , IL-6, and TNF- α ”

Children injured by mRNA vaccines – 16 cases of new onset Lupus

[VAERS 1337921](#): 16F (New Mexico) had 1st Pfizer mRNA. Two days later began having polyarthralgia, myalgias, arthritis, etc, suggestive of Lupus

[VAERS 1424433](#): 17F (Virginia) had 2nd Pfizer mRNA. 2 weeks later began having chest pain and shortness of breath, lab work positive for Lupus.

[VAERS 1474796](#): 16F (Virginia) had 1st Pfizer. 1 week later started having rashes on her legs along with her feet swelling and hurting. After 2nd Pfizer, her whole body developed rashes and her feet pain got worse. Doctors suspect Lupus.

[VAERS 1794837](#): 16F (North Carolina) had 2nd Pfizer. 39 days later seen for joint pain that started a few weeks after 2nd dose. Now diagnosed with Lupus and glomerulonephritis.

[VAERS 1866616](#): 16M (Foreign) had 2nd Pfizer mRNA. 2 days later started developing skin reaction, by 12 days he had butterfly rash on both cheeks and reported to the hospital. Small rashes observed in extremities and abdomen. Diagnosis: discoid lupus erythematosus.

[VAERS 1915358](#): 15M (Foreign) had 2nd Pfizer mRNA. 9 days later was hospitalized with myocarditis, pericarditis, SLE (Lupus).

[VAERS 1934578](#): 12F (Foreign) had Pfizer mRNA on Sep.24, 2021. She had fever for 2 weeks after mRNA and presented to emergency with weakness of limbs and fever. Was diagnosed with SLE (Lupus).

[VAERS 1967228](#): 15F (Illinois) had 2nd Pfizer. 10 days later admitted with chest pain, diagnosed with pulmonary emboli, SLE, Lupus nephritis

[VAERS 1994301](#): 14M (Foreign) had 1st Pfizer mRNA on Oct.17, 2021. Diagnosed with Lupus on Nov.12, 2021, thrombocytopenic purpura, etc.

[VAERS 2073323](#): 10F (California) had 2nd Pfizer. 21 days later admitted with auto-immune testing, diagnosed with SLE (Lupus) Nephritis

[VAERS 2192193](#): 8F (Colorado) had 2nd Pfizer. 30 hours after Vaccination started getting daily intermittent fevers and extremity edema. Diagnosis: New SLE (Lupus) complicated by lupus nephritis

[VAERS 2231412](#): 17F (Massachusetts) had 2nd Pfizer mRNA. 13 days later developed sore throat and fevers, diagnosed with SLE and lupus nephritis

[VAERS 2321591](#): 15F had 2nd Pfizer mRNA. Developed Lupus from the vaccine.

[VAERS 2379244](#): 11M had 2nd Pfizer mRNA. Was diagnosed with Lupus 8 months later.

[VAERS 2482327](#): 16F had Pfizer mRNA on Nov.24, 2021. Hospitalized and diagnosed with SLE (Lupus) with Nephritis on Dec.22, 2021.

[VAERS 2582228](#): 11F (Kentucky) had 3rd Pfizer mRNA. 3 days later had acute onset of facial lesions (erythematous maculae). This evolved into diffuse erythematous annular rash confirmed to be acute cutaneous Lupus Erythematosus.

My Take...

This Florida mom gave her 7 year old daughter Pfizer COVID-19 mRNA Vaccines, and 10 days after the 2nd Pfizer jab, the girl started having chest pain, rashes, joint pain and now has an auto-immune disease for life for which she is on steroids and immune modulators.

This mother was tragically oblivious to the dangers and toxicity of COVID-19 mRNA Vaccines in children, and trusted corrupt and incompetent pediatricians and politicians. Now her

daughter is disabled for life.

I do appreciate that she had the courage to share the story.

Not only are her daughter's symptoms not controlled by multiple medications, but she has no idea of the long term consequences of this kind of immune system damage.

The fact that there are 16 VAERS cases of Children whose immune systems have been permanently damaged with Systemic Lupus Erythematosus (with or without kidney inflammation and kidney damage), means there are hundreds of such children permanently injured and disabled, whose reports never made it to VAERS.

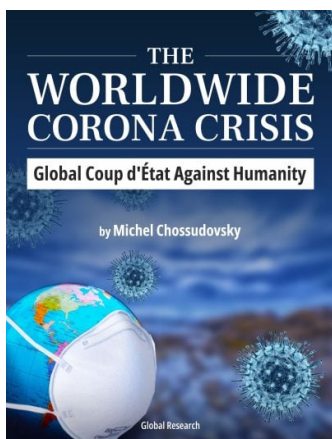

Yet another reason to do everything possible to get COVID-19 mRNA Vaccines off the market immediately and banned from use in children!

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow

human beings and our children worldwide. Truth is a powerful instrument."

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
