Introductory Note and Update

On December 15, 2022 about three weeks after her third Pfizer booster shot, Princess Bajrakitiyabha Narendira Debyavati collapsed with heart issues and went into a coma. “The 44-year old eldest daughter of the King in Thailand, and likely heir to the throne, had reported to be in excellent health prior to the vaccination.

“Top Thai officials are pulling off their gloves against Pfizer Bio N Tech [yet to be confirmed] and could become the first country in the world to Nullify the contracts between the government and Pfizer.

Which would mean Pfizer would have to pay back billions of dollars because of their jabs to the Thai people.”

Flashback to Our January 28, 2022 report

What is of significance (confirmed by the Bangkok Post) is that more than a Year Ago the Royal Thai Government firmly acknowledged the deaths and adverse events affecting Thais who had taken the vaccine jab.

A compensation program was announced and implemented in December 2021:

“Out of the 11,707 people who filed a claim with the authorities, 8,470 people, or 72.3% of all claimants, have been compensated”.

1,962 individuals, namely 23% of those compensated “were left permanently paralysed or died after receiving their Covid-19 shot”.

This decision has a bearing on recent developments pertaining to Princess Bajrakitiyabha.

My observations in January 2022 were the following:

People in Thailand and around the World will be informed of the decision of the Royal Thai Government and will refuse to take the jab.

And this decision regarding compensation to the Covid Vaxx victims establishes a legal precedent. It sets the stage for compensation Worldwide on behalf of the victims of the vaccine and their families.

Class action law suits as well criminal charges against Big Pharma and corrupt governments are forthcoming.

National governments will no longer be able to deny the devastating impacts of what is widely recognized by scientists and medical doctors as a killer vaccine.

Nor will they be able to impose a vaccine passport.

Also, if you have any doubts consult [the “Confidential Report” by Pfizer](#) released under Freedom of Information which confirms unequivocally the criminal nature of the mRNA vaccine which has resulted in a Worldwide wave of deaths and injuries:

“What is contained in Pfizer’s “confidential” report is detailed evidence on the impacts of the “vaccine” on mortality and morbidity. This data which emanates from the “Horse’s Mouth” can now be used to confront as well formulate legal procedures against Big Pharma, the governments, the WHO and the media.”

Side Effects Cost Royal Thai Government One Billion Baht

Bangkok Post,

December 28, 2021

Almost one billion baht in compensation has been paid out to Thais who suffered adverse side effects from the Covid-19 vaccine over the past eight months, says the National Health Security Office (NHSO).

About 927 million baht [28 million dollars] in compensation was approved between April 5 and Dec 26 [2021], it said.

Out of the 11,707 people who filed a claim with authorities, 8,470 people, or 72.3% of all claimants, have been compensated, said Atthaporn Limpanyalert, spokesman and deputy secretary-general of the NHSO.

The claims were grouped into three categories, the first being claims filed by vaccine recipients who reported mild to moderate side effects after receiving their Covid-19 jab.

In total, there are 6,298 people in this category, Dr Atthaporn said, noting they are eligible to receive no more than 100,000 baht in compensation from the government.

The second category, Dr Atthaporn said, comprises claims filed by those who experienced temporary paralysis and/or loss of other bodily functions after they were vaccinated, noting the 210 people in this category will receive up to 240,000 baht in compensation.

The final category is made up of individuals who were left permanently paralysed or died after receiving their Covid-19 shot. The 1,962 people in this category are eligible to claim up to 400,000 baht in compensation.

Out of the 11,707 claims filed, 1,752 were rejected because the claimants failed to meet the criteria set out — 615 of whom have lodged an appeal.

Claimants are entitled to seek the compensation for themselves and/or relatives without having to prove without doubt that their health condition was indeed caused by receiving the Covid vaccine.

Dr Atthaporn said the NHSO has set up 13 committees throughout the country to process the compensation claims, adding compensation will be paid within five days of the petition being approved.

Meanwhile, the NHSO transferred an additional 31.3 billion baht to 1,942 medical facilities and hospitals nationwide in October and November to help the fight against Covid-19, said NHSO secretary-general Jadet Thammathat-aree.
