Region: [USA](#)

Theme: [History](#), [Intelligence](#), [Media Disinformation](#), [Terrorism](#), [US NATO War Agenda](#)

*It has been 16 years since the crimes of September 11<sup>th</sup>, 2001. In that time, facts have been revealed that led [more than a third](#) of Americans to believe that the U.S government was involved in the attacks. This blog noted [14 such incredible](#) facts on the 14<sup>th</sup> anniversary of the crimes. Here are 16 more.*

1. In the nine years before 9/11, the FBI failed miserably at preventing terrorism. There are many examples of how FBI leadership under [director Louis Freeh](#) facilitated and covered-up acts of terrorism during this time. After 9/11, the FBI took extraordinary measures to hide evidence related to the attacks.
2. CIA [director George Tenet](#) led an agency that also failed in its duties related to counterterrorism and those failures appear to have been intentional. Like Freeh, Tenet had developed secret paths of communication with Saudi authorities. The facts suggest that Tenet facilitated the crimes of 9/11.
3. The FBI and CIA have [made a mockery](#) of the U.S. justice system as it relates to 9/11. While these agencies are suspected of involvement, they have charged others with the crimes using secret evidence in a secret military trial. The accused have been held in seclusion for nearly 15 years while FBI and CIA agents attempt to insert themselves as defense team members, ensuring total control of the narrative.
4. CIA officers responsible for identifying deception in others fail to notice that the [characteristics of deception](#) are amply demonstrated when government representatives respond to questions about 9/11.
5. There have been [four, distinctly different](#), official accounts given for how the North American air defense system failed to intercept any of the hijacked planes. The last account says that dozens of military officers spent years lying to Congress, the 9/11 Commission, and everyone else, in ways that made the military look bad. Few observers considered the simpler explanation—that the 9/11 Commission lied to divert attention from many difficult questions.
6. Parts of the official account of 9/11 are based on the highly improbable flight path of a [military cargo plane](#) called *Gofer 06*. The crew of this plane witnessed the crashes of two of the four planes that day despite those crashes occurring 127 miles and less than 30 minutes apart.
7. There are [dozens of unanswered](#) questions about the events at the Pentagon and the plane that reportedly crashed there.
8. The 19 young men accused within 72-hours of the attacks were known to enjoy strip bars, alcohol, drugs, and other things that are clearly [non-Muslim activities](#). Moreover, these suspects were not capable of accomplishing most of what was needed to pull off the crimes.

9. Mohamed Atta, the man called the “9/11 ringleader,” had a [lot in common](#) with Lee Harvey Oswald—the man accused of killing President Kennedy. Both Atta and Oswald were suspected of using illicit drugs, seemed to be protected by authorities, and were associated with CIA-linked entities.
10. The *New York Times* led the propaganda behind the U.S. invasion of Iraq in 2003 and it also [led the propaganda](#) behind the cover-up of the 9/11 crimes. It did so by ignoring many of the most relevant facts, by promoting false official accounts, and by belittling those who questioned the 9/11 events.
11. On the day of the attacks, [firefighters](#), journalists, survivors, and [eyewitnesses](#) testified to secondary explosions in the World Trade Center buildings. Videos of these testimonies were held secret for years by the government agency NIST and released only via FOIA request after public interest died down. [Scientists have explained](#) that the towers came down due to explosions and that the NIST investigation was fraudulent.
12. Among the evidence ignored by the mainstream media are many facts indicating the [presence of thermite](#) at the World Trade Center. Thermite is a chemical mixture that can be used to melt and cut structural steel. Instead of addressing this evidence, supporters of the official account have engaged in deception and distraction in order to obfuscate the facts.
13. Despite recent, worldwide protests against the abuse of science, the [most glaring example](#) of politically motivated pseudoscience continues to be ignored by many scientists. That is the 7-year sequence of contradictory explanations provided by U.S. government investigators for the destruction of the WTC buildings.
14. Links between 9/11 and the 1995 bombing in Oklahoma City lead to questions about the company that controlled security for many of the facilities impacted on 9/11, including the WTC complex. For instance, that WTC security company shared the [same OKC airport](#) office later occupied by the flight trainer for Zacarias Moussaoui, the alleged “20<sup>th</sup>”
15. Media and certain government representatives have hinted at Saudi Arabian ties to the 9/11 crimes. However, those hints always omit the [most interesting links](#) between the 9/11 attacks and Saudi Arabia—links that implicate powerful people in the United States.
16. When the long-awaited 28 pages missing from the *Congressional Joint Inquiry Report* into 9/11 were finally released, [those pages reinforced](#) concerns that deep state players were involved in the attacks.

As the crimes of 9/11 continue to go unsolved and largely unquestioned, Americans should be aware that another 9/11 could happen at any time. If that happens, everyone should realize that ongoing failure to question obvious deception in terrorism could take society to places where freedom to question is no longer an option.
