

Smoking Gun Proof that Russia Hacked the Entire World

Political Satire

Region: [Europe](#), [Middle East & North Africa](#),
[Russia and FSU](#), [USA](#)
Theme: [Intelligence](#), [Media Disinformation](#)
In-depth Report: [FAKE INTELLIGENCE, U.S. Elections](#)

As shown below, the allegations that Russia has been hacking the entire world have been thoroughly vetted and verified.

Germany

Germany's intelligence agency [accused](#) Russia of deploying cyberattacks to destabilize the government!

(But German intelligence agencies later [found no evidence of Russian interference](#).)

And last December, German security officials [said](#) that Russia hacked secret German communications and provided them to Wikileaks ([English translation](#)).

(But German officials later [concluded](#) that the communications were likely leaked from an *insider* within the German parliament, the Bundestag ([English translation](#))).

France

The [Washington Post](#), [New York Times](#) (and [here](#)), [Reuters](#), [Politico](#), [Register](#) and many other mainstream publications claimed that the Russians hacked the French election, just like they hacked the U.S. election.

The head of the NSA claimed that the NSA *watched* the Russians hack the French elections:

(But the French government later said there was [no trace of Russian hacking](#).)

Qatar

CNN [reported](#) that U.S. officials suspected that Russia had hacked Qatar's state news agency, causing a rift with Saudi Arabia.

(But the Qatari government later said [it wasn't Russia](#).)

America

The Washington Post [published](#) a story claiming that Russian hackers penetrated the US power grid through a utility in Vermont.

(The Post subsequently [admitted](#) that – according to officials close to the investigation – “the incident is not linked to any Russian government effort to target or hack the utility”, that the incident only involved a laptop not connected to the electrical grid, and there may not even have been malware at all on this laptop.)

When a treasure trove of secret NSA tools were revealed, [Russian hackers](#) were blamed.

(But it turns out that it was probably a [leak by an NSA insider](#).)

And of course the evidence that the Russians hacked Democratic party emails and leaked them to Wikileaks – and otherwise stole the election away from Clinton – is *extremely* strong. After all, the mainstream press has said so.

([Maybe not so much](#) ...)

So you see? It's been *proven* that Russia has hacked the world ...
