Synopsis

In this second edition of Michel Chossudovsky's 2002 best seller, the author blows away the smokescreen put up by the mainstream media, that 9/11 was an attack on America by "Islamic terrorists". Through meticulous research, the author uncovers a military-intelligence play behind the September 11 attacks, and the cover-up and complicity of key members of the Bush Administration.

The expanded edition, which includes twelve new chapters focuses on the use of 9/11 as a pretext for the invasion and illegal occupation of Iraq, the militarization of justice and law enforcement and the repeal of democracy.

According to Chossudovsky, the “war on terrorism” is a complete fabrication based on the illusion that one man, Osama bin Laden, outwitted the \$40 billion-a-year American intelligence apparatus. The “war on terrorism” is a war of conquest. Globalization is the final march to the “New World Order”, dominated by Wall Street and the U.S. military-industrial complex.

September 11, 2001 provides a justification for waging a war without borders. Washington’s agenda consists in extending the frontiers of the American Empire to facilitate complete U.S. corporate control, while installing within America the institutions of the Homeland Security State.

In these unprecedented economic times, the world is experiencing as a whole what most of the non-industrialized world has experienced over the past several decades. For a nuanced examination of the intricacies of the global political-economic landscape and the power players within it, order your copy of America’s War on Terrorism.

The Globalization of Poverty and the New World Order

Michel Chossudovsky takes the reader through an examination of how the World Bank and IMF have been the greatest purveyors of poverty around the world, despite their rhetorical claims to the opposite. These institutions, representing the powerful Western nations and the financial interests that dominate them, spread social apartheid around the world, exploiting both the people and the resources of the vast majority of the world's population.

As Chossudovsky examines in this updated edition, often the programs of these international financial institutions go hand-in-hand with covert military and intelligence operations undertaken by powerful Western nations with an objective to destabilize, control, destroy and dominate nations and people, such as in the cases of Rwanda and Yugoslavia.

To understand what role these international organizations play today, being pushed to the front lines and given unprecedented power and scope as ever before to manage the global economic crisis, one must understand from whence they came. This book provides a detailed, exploratory, readable and multi-faceted examination of these institutions and actors as agents of the 'New World Order,' for which they advance the 'Globalization of Poverty.'

Synopsis

In this expanded edition of Prof. Michel Chossudovsky's international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalization of poverty.

This book is a skillful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically.

In this updated and enlarged edition – which includes ten additional chapters and a new introduction – the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalization.
