Melissa Torrente died in her sleep the night of September 2nd. This sudden unexpected death is deeply saddening for her family, her husband’s family, and the many friends Melissa and Sean have amassed together. Melissa was always a strong supporter of community and would have wanted me to reach out to all of you who can help support her husband Sean and their two wonderfully mischievous children.

Melissa dedicated her professional life to helping individuals move through grief and trauma. She started on this path and began improving her skills in the early 2000’s as a Care Worker at a Youth Residential Treatment Center. **Next she became a Teacher at a Title I School. After these formative experiences she went after a Masters Degree in Social Work and brought her light into Child Protective Services as a Social Worker.** After CPS and gaining her LCSW Melissa moved to Guatemala to fortify her Spanish speaking skills and worked as an Elementary School Therapist (where she snatched up Sean as well). Todd and Nicky Baker's life plunged from joy to despair in just a few hours.

On the way home from their grandson's festive second birthday last month, the Taranaki couple from Patea received the police call no parent ever wants to receive.

Their youngest daughter - 17-year-old Kaitlyn - had been found dead in Christchurch.

She simply did not wake up on the morning of August 5.

Believed to have no underlying health issues beforehand, Kaitlyn's cause of death is a mystery and the family may have to wait until the end of a coroner's investigation before they get an answer.

Story by Paul Britton • 1w

Tributes are being paid to a doting mum described by friends as 'the most beautiful girl inside and out' after her sudden death. Becky Collins was just 35 and leaves a 12-year-old son.

She died suddenly at her flat in Whalley Range, Manchester, last week. Her niece had a summer holidays sleepover with Becky and her son, but tragically she was found to have died in the morning, her devastated family revealed.

Becky suffered a previous heart attack at the age of 30. The family said they are now waiting for the results of a post-mortem examination to shed light on the tragedy and possibly determine a cause of death.

It feels utterly unbelievable, something she would've definitely ascribed to this being the worst timeline, but [Joseph Blair](#) and I learned from her family today that our sweet and salty, snarky, sarcastic, brilliant, generous, kind, hard mode playing but not hardened, beautiful, lovely, and above all genuine and genuinely wonderful friend, [Michelle Anne Dash](#), sadly passed away peacefully in her sleep overnight. I hope Elon Musk gets the worst shits of his life today and that Paul Reubens was holding the door for her when she showed up in the afterlife. Please help us share amazing memories of Michelle and the many ways she touched us all, sometimes for the better

Jennifer Allen, a Canadian surrogacy champion who helped well over 100 families achieve their dreams of having children, has died at age 36.

After being a surrogate four times herself, Allen founded JA Surrogacy Canada in an effort to create a less "transactional," more supportive environment for both "intended parents" and the women serving as their surrogates, said Michelle Avery, the agency's chief operating officer and Allen's best friend.

Allen believed strongly that everyone who wants a baby should be able to have one, but "she couldn't have everybody's baby," Avery said.

"So her goal was that everybody that came to her, she was going to help them to build their families and do it with transparency and integrity and compassion."

Allen died in Calgary on July 28. Her family is not specifying the cause of death, except to say that she died in her sleep and it was unexpected, Avery said.

She leaves behind her husband, Phil Allen, their 10-year-old daughter Abigail Maria Allen and their nine-year-old son Daniel John Louis Allen.

July 28, 2023 – Calgary, Alberta

Jennifer Allen (nee Mcrae), of Calgary, AB, passed away suddenly on Friday, July 28, 2023, at the age of 36 years.

Jennifer was born in Calgary, AB, on December 11, 1986, and spent many of her developing years in Penticton, B.C.

Jennifer married the love of her life Phil Allen on May 12, 2012, and together they created their beautiful family with the births of their two children Abigail Maria Allen in December 2012 and Daniel John Louis Allen in April 2014.

She was the Founder and CEO of JA Surrogacy, a company that was built out of the love she experienced in becoming a mother and a surrogate herself. Her company was the expression of her core values, helping others to experience the love and dreams she felt blessed to have experienced herself. To this day her work and her village have supported hundreds of families around the world in becoming complete. Before JA Surrogacy, Jennifer had proudly worked at AARC and the Boys and Girls Club of Airdrie where she was able to support and empower young women and men to better lives.

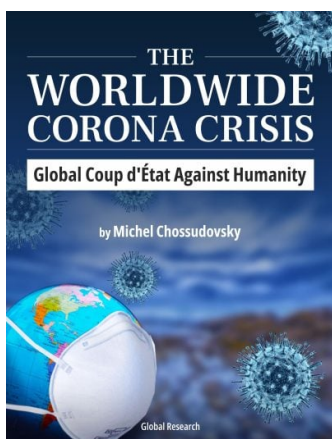

Jennifer lived with intensity and accomplished much throughout her life and was particularly proud of the home she created and filled with her many animals, especially her beloved Griz. She would never shy away from loving an animal and attempting to pet it. Jennifer even tried to pet alligators in Florida and tigers in Thailand to the delight and horror of her husband and kids on their family vacations.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying

Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.
—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
