Oct. 27, 2023 - Germany - 40 year old Marc Dippold, died suddenly on Oct. 27, 2023.

SG in shock: Marc Dippold has died

Sad news for all soccer players in the Play circle. The longtime Ramsenthal player Marc Dippold, who is in the took responsibility as a trainer in recent years, is only at the age of 40 Years passed away. The sympathy of the football community goes to his relatives and friends.

From Hans-Jürgen Wunder

For Marc Dippold, club loyalty still counted something. The Ramsenthaler spent his football life in the Bindlach district, was able to celebrate the flight up to the district league and was also there as it went back to the A-Class. And not only that. In difficult times with double descent he agreed to keep the troops together. As a player coach, in a responsible position. And his work was fruitful. Already in the last season the Ramsenthalers were listening, under his direction almost sniffed on the climb. The long-time captain had only jumped into breach when Ronny Hofmann once had to stop. But the embarrassment solution was an ideal constellation become. So it made sense that Marc Dippold continued, as the Lack of staff due to a syndicate with the Bindlacher was worked. He has been with the A-class team since the beginning of this season with whom he had ambitious goals. He also worked with the Bindlacher Coach Fatos Haziri very trustingly together .

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.

—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
