On Thursday, the Syrian Arab News Agency (SANA) released a video showing of the weapons and ammunition captured by the Syrian Arab Army (SAA) and the Tiger Forces from ISIS in Mayadin city.

The video showed that the SAA has captured dozens of light, and heavy machine guns and sniper rifles. The SAA also captured several anti-tank weapons including at least 3 Russian-made RPG-29. In addition, 2 unidentified man-portable air-defense systems (MANPADs) were captured by the SAA. The SAA also seized more than 20 drones, and what appears to be some ISIS made DIY drones.

The SAA also captured the following heavy weapons:

- 3 T-55 tanks one of them up-armored;
- 1 T-62 tank;
- 1 Humvee armored vehicle;
- 1 VBIED;
- 1 M-46 130 mm artillery pieces;
- 2 D-20 152 mm artillery piece;
- 1 D-30 122-mm artillery piece mounted on a truck.

A US-made M198 155mm artillery piece was also sized by the SAA. The piece was likely captured by ISIS from the Iraqi Army back in 2014. The ISIS serial number on the artillery is (008), which could mean that ISIS captured at least 8 of these US made artillery.

Syrian pro-government sources released another video that showed a communication center of ISIS. According to the sources, the SAA captured many US-made military radio systems inside the center.

An officer of the SAA told SANA that the weapons and ammunition that were displayed are only 25% of what the SAA sized inside Mayadin. The amount of the weapons captured by the SAA proves that ISIS didn't expect the SAA could advance so rapidly towards this strategic city.
