How is it that a vaccine for the SARS-CoV-2 virus, which under normal conditions would take years to develop, was promptly launched in early November 2020? The vaccine announced by Pfizer is based on an experimental gene editing [mRNA technology which has a bearing on the human genome](#).

Were the standard animal lab tests using mice or ferrets conducted?

Or did Pfizer [“go straight to human “guinea pigs.”](#) Human tests began in late July and early August. “Three months is unheard of for testing a new vaccine. [Several years is the norm.](#)”

This caricature by Large + JIPÉM explains our predicament:

Mouse No 1: "Are You Going to get Vaccinated",

Mouse No. 2: Are You Crazy, They Haven't finished the Tests on Humans"

Barely reported by the media: "[Six people died in Pfizer's late-stage trial](#) of the COVID-19 vaccine, the FDA revealed just hours after Britain became the first country in the world to roll out the vaccine."
