More information is available that suggests the the government had advance information that ebola was coming to the US and that the government expects a much larger outbreak of the disease in the US than it admits.

Keep in mind that Washington is evil and has been killing people in seven countries for thirteen years based entirely on lies. Keep in mind that Washington has a long list of countries that it has destabilized. Most recently Washington overthrew the elected government in Ukraine and is currently working on the remaining independent governments in the Middle East, Russia, and China as Tony Cartalucci's article documents:

Here is a report from Natural News:

The U.S. government knew about the outbreak in advance, but didn't warn the public

It's now clear that the U.S. government has long known this outbreak was coming but did nothing to warn the public.

In early September, the government sought to purchase 160,000 Ebola hazmat suits from a U.S. supplier.

Furthermore, according to this report on SHTFplan.com, "Disaster Assistance Response Teams were told to prepare to be activated in the month of October."

Don't you find it strange that while the government itself was gearing up for an October disaster, the public wasn't told a thing about any of this?
