

The USAF B-2 Spirit Stealth Bomber: “An Instrument of Peace”...

"Protecting the Lives of Libyan Civilians"

In-depth Report: [NATO'S WAR ON LIBYA](#)

Deployed to Libya on March 19, this is the weapon which is meant to save civilian lives in Libya. The B-2 Spirit Stealth bomber.

The B-2 Spirit aircraft is described as “deadly and effective” yet at the same time it is upheld as an instrument of “humanitarian warfare”.

Used at the outset of Operation Odyssey Dawn, this aircraft has the mandate under UN Security Council resolution 1973 to “protect the lives of civilians”.

See the following video to see how this aircraft “save the lives of civilians”:

Northrop Grumman Video Clip on the B-2

“Humanitarian war” is carried out through a “Shock and Awe” Blitzkrieg.

Three B-2 Spirit Stealth bombers were sent on a bombing mission at the very outset of the Libya bombing campaign. According to the reports, they returned to Whiteman Air Force base on March 21st. The reports suggest that the three B-2s were carrying bunker buster bombs with conventional warheads.

“Three B-2 Spirit bombers, piloted by two men each, made it back after the 11,418-mile round trip from the Whiteman Air Force Base in Missouri – where they are kept in special hangars – to Libya, where they hit targets on forces loyal to Colonel Gaddafi and back

again.”(Libya-crisis-B2-stealth-bombers-25-hour-flight-Missouri-Tripoli, Daily Mail, March 21, 2011)

The report suggests that the B-2 Stealth bombers dropped 45 one ton satellite guided missiles on Libya, which represents an enormous amount of ordnance: “At \$2.1bn, they are the most expensive warplanes in the world and rarely leave their climate-controlled hangars. But when it does, the B-2 bomber makes **a spectacularly effective start to a war - including during this weekend’s aerial attack on Libya’s air defences.** ([Daily Mail](#), March 21, 2011, *op cit*)

While we are not in a position to verify the accuracy of these reports, the 45 one-ton bombs correspond roughly to the B-2 specifications, namely each of these planes can carry sixteen 2,000 pound (900 kg) bombs.

“An assessment published by the USAF showed that two B-2s armed with precision weaponry can do the job of 75 conventional aircraft. That makes it a powerful weapon to strike targets including bunkers, command centres, radars, airfields, air defences.” The mission is said to have dropped a total of 45 one ton satellite guided missiles, which broadly corresponds to the 15 out of the 16 2000 pound bombs mentioned above.(The Daily Mail, March 21, 2011).

The B-2 Spirit is also a carrier of the B61-11 nuclear bomb, equipped to deliver 16 B61-11 mini-nukes of about 1,200 lb (540 kg), each of which has an explosive capacity of two thirds of a Hiroshima bomb.
