As the architects of the Build Back Better society assist you in creating easier ways to show your vaccinated and compliant status, perhaps it is prudent to pause and think about the discussions that take place behind the opaque glass doors.

Right now, as you are reading this, under the guise of enhancing your safety, the U.S. federal government is in discussions with multinational corporations and employers of citizens to create a more efficient process for you to register your vaccine compliance.

You may know their conversation under the terminology of a *COVID passport*. The current goal is to make a system for you to show your authorized work status; which, as you know, is based on your obedience to a mandated vaccine.

Beta tests are being conducted in various nations, each with different perspectives and constitutional limitations based on pesky archaic rules and laws that govern freedom. For the western, or for lack of a better word ‘*democratic*’ outlook, Australia is leading the way with their technological system of vaccination check points and registered state/national vaccination status tied to your registration identification.

The checkpoints are essentially gateways where QR codes are being scanned from the cell phones of the compliant vaccinated citizen. Yes comrades, there’s an App for that.

Currently the vaccine status scans are registered by happy compliance workers, greeters at the entry to the business or venue. Indeed, the WalMart greeter has a new gadget to scan your phone prior to allowing you custody of a shopping cart.

In restaurants, the host or hostess has a similar compliance scanner to check you in prior to seating or reservation confirmation.

It's simple and fun. You pull up your QR code on your cell phone (aka portable transponder and registration device), using the registration App, and your phone is scanned delivering a green check response to confirm your correct vaccination status and authorized entry.

The Australian government, at both a federal and state level, is working closely with Big Tech companies (thirsting for the national contract) to evaluate the best universal process that can be deployed nationwide.

As noted by all six Premiers in the states down under, hardware (scanners) and software (registration) systems are all being tested to find the most comprehensive/convenient portable units to settle upon. Meanwhile in the U.S., cities like Los Angeles and New York await the beta test conclusion before deploying their own version of the same process.

Then again... *"For those in the privileged class allowed to shop, take note of Covid signs which encourage cashless transactions under the guise of 'health'. Messaging around cards being 'safer' will increase until the Treasury tries to remove cash entirely, almost certainly with public approval."*

Wait, now we are squinting at that familiar image on the horizon because we know those who control things have been talking about a cashless society for quite a while.

We also know that data is considered a major commodity all by itself. Why do you think every system you encounter in the modern era requires your phone number even when you are not registering for anything. It, meaning you, us, are all getting linked into this modern registration system that is defining our status. We also know that system operators buy and sell our registered status amid various retail and technology systems.

Yeah, that opaque shadow is getting a little clearer now.

Perhaps you attempt to purchase dog food and get denied entry into Pet Smart because you didn't renew the car registration. Or perhaps you are blocked from entry because you forgot to change the oil on the leased vehicle you drive and Toyota has this weird agreement with some retail consortium. You head to the oil change place that conveniently pops up in the citizen compliance App *-it's only two blocks away-* they clear the alert after they do the oil and you are gateway compliant again.

Missed your booster shot? We're sorry citizen, your bank account is frozen until your compliance is restored... please proceed to the nearest vaccination office as displayed conveniently on your cell phone screen to open access to all further gates (checkpoints).... tap to continue...
