Remdesivir/Veklury & mRNA vaccines are harmful to your children, no one, no Fauci, Bourla of Pfizer, Bancel of Moderna, or O'Day Gilead prosecuted case of why this is needed in kids; poor methods/data

They are coming and tag-teaming off each other...be warned!

These three pieces of news shows they have our kids in their cross-hairs, these three pharmaceutical companies, have our healthy children in sight and coming in hard, and I challenge these people, these three CEOs to show us the evidence, show us the data, any data to show that we must be vaccinating healthy children, 6 month year olds etc. or giving them this liver and kidney toxic drug at 28 days, using these ineffective vaccines that are based on the initial Wuhan legacy strain and they know this will not work on the OMICRON or future variants (vaccinal induced mRNA antibodies do not hit the spike protein on omicron, does not neutralize), and are proven harmful now with accumulated deaths in healthy young persons, or why is Remdesivir needed when it is a failed Ebola and Marburg virus drug and is shown to kill people, liver and kidney toxic...are we all insane now? we will give a drug that was waiting for a virus, to our kids? are we as parents and people just going to sit back?

These three pieces of reporting should frighten you and wake you up!

1. [Moderna seeks to vaccinate 6 month olds to 5 years](#)
2. [The US Food and Drug Administration announced Monday that it has expanded approval of the Covid-19 drug remdesivir to treat patients as young as 28 days](#)

[and weighing about 7 pounds.](#)

3. [Covid-19 vaccine for 5- to 11-year-olds is safe and shows 'robust' antibody response, Pfizer says](#)
