

Towards a World War III Scenario: The Dangers of Nuclear War

By [Prof Michel Chossudovsky](#)
Global Research, November 12, 2018

Theme: [Military and WMD, US NATO War Agenda](#)
In-depth Report: [Nuclear War](#)

Today, people are finally waking up to the dangers of a world war, which might emanate from the highest levels of the US government.

We are no longer dealing with a hypothetical scenario. The threat of World War III is real. Public opinion has become increasingly aware of the impending dangers of an all out US-NATO led war against Iran, North Korea and the Russian Federation.

WW III has been contemplated by the U.S. and its allies for well over fifteen years as revealed in Michel Chossudovsky's 2012 best-seller: "[Towards a World War III Scenario: The Dangers of Nuclear War](#)"

Excerpt below

The US has embarked on a military adventure, "a long war", which threatens the future of humanity. US-NATO weapons of mass destruction are portrayed as instruments of peace. Mini-nukes are said to be "harmless to the surrounding civilian population". Pre-emptive nuclear war is portrayed as a "humanitarian undertaking".

While one can conceptualize the loss of life and destruction resulting from present-day wars including Iraq and Syria, it is impossible to fully comprehend the devastation which might result from a Third World War, using "new technologies" and advanced weapons, until it occurs and becomes a reality. The international community has endorsed nuclear war in the name of world peace. "Making the world safer" is the justification for launching a military operation which could potentially result in a nuclear holocaust.

Nuclear war has become a multi-billion dollar undertaking, which fills the pockets of US defense contractors. What is at stake is the outright “privatization of nuclear war”.

The Pentagon’s global military design is one of world conquest. The military deployment of US-NATO forces is occurring in several regions of the world simultaneously.

Central to an understanding of war, is the media campaign which grants it legitimacy in the eyes of public opinion. A good versus evil dichotomy prevails. The perpetrators of war are presented as the victims. Public opinion is misled.

Breaking the “big lie”, which upholds war as a humanitarian undertaking, means breaking a criminal project of global destruction, in which the quest for profit is the overriding force. This profit-driven military agenda destroys human values and transforms people into unconscious zombies.

The object of this book is to forcefully reverse the tide of war, challenge the war criminals in high office and the powerful corporate lobby groups which support them.

Reviews

"This book is a 'must' resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since '9-11' against non-nuclear countries to seize their oil fields and resources under cover of 'freedom and democracy'."

–John McMurtry, Professor of Philosophy, Guelph University

"Professor Chossudovsky's hard-hitting and compelling book explains why and how we must immediately undertake a concerted and committed campaign to head off this impending cataclysmic demise of the human race and planet earth. This book is required reading for everyone in the peace movement around the world." *–Francis A. Boyle, Professor of International Law, University of Illinois College of Law*

"In a world where engineered, pre-emptive, or more fashionably "humanitarian" wars of aggression have become the norm, this challenging book may be our final wake-up call." *– Denis Halliday, Former Assistant Secretary General of the United Nations*

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world's only superpower, and diplomats work as salesmen for the defense industry, the whole world is recklessly endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction. *–Ellen Brown, author of 'Web of Debt' and president of the Public Banking Institute*
